Payments to hospitals under the act will be by the state industrial accident commission and all hospitals, in order to apply for benefits, must register with the commission and agree to abide by the schedule of hospitalization costs fixed and promulgated for industrial accidents by the commission. Hospitals are required to make monthly reports to the commission, listing complete detail of the accident cases for which they make claims for payments.

Under definitions in the act, "indigent patient" is defined as a person who has suffered an accidental motor vehicle injury, is received and cared for in a hospital and is unable to pay for the cost of such care. It excludes an employe suffering from a motor vehicle injury on account of which he is entitled to the benefits of the workmen's

## Auto Accident Fund Expected To Total \$250,000 From New Cost of Driver Licenses

Approximately \$250,000 will go into the newly-created "motor vehicle accident fund" during the coming two years when Oregon drivers contribute 50 cents each as they obtain their driver's licenses for the 1941-1943 license period.

The fund is set up by the law enacted by the 1941 legislative assembly taxing each operator a fee of 50 cents in addition to the regular fee of one dollar for his driver's license. The fund thus created will be used to defray hospitalization expenses of indigent persons injured in automobile accidents.

No change has been made in the driver examination law this year and all drivers holding current licenses may renew without taking any examination except those applicants who are 70 years of age or older, and those who were not licensed during the 1939-1941 period.

The law setting up the motor vehicle accident fund provides that "before issuing, or renewing any motor vehicle operator's license except chauffeur's licenses, instruction permits, emergency permits and student permits, the secretary of state shall collect from each applicant therefor an additional sum of fifty cents for each license. . . . While in effect the fee amounts to 25 cents a year, it must be paid in one sum of 50 cents at the time the license is obtained."

Payments to hospitals under the act will be by the state industrial accident commission and all hospitals, in order to apply for benefits, must register with the commission and agree to abide by the schedule of hospitalization costs fixed and promulgated for industrial accidents by the commission. Hospitals are required to make monthly reports to the commission, listing complete detail of the accident cases for which they make claims for payments.

Under definitions in the act, "indigent patient" is defined as a person who has suffered an accidental motor vehicle injury, is received and cared for in a hospital and is unable to pay for the cost of such care. It excludes an employe suffering from a motor vehicle injury on account of which he is entitled to the benefits of the workmen's

responsible for his care or support, for the amount thereof, execution thereon would be unavailing."

When claim for payment is filed by a hospital, it must contain an affidavit of the indigent patient, if living, and the statement of a county court, county judge, county commissioner, or like official representative of a social agency engaged in the relief of the poor, having knowledge of the facts, showing that the indigent patient is unable to pay such hospital charges.

**Orchestra Plays**—The Salem Elks lodge observes orchestra night at the meeting tonight. The special program was postponed from a previous meeting.

## Mary Bennett Rates Honor
