

Oregon Hop Mart Firm

Demand Active for Remaining 1940 Crop Supply

Oregon hop markets were firm during the past week, according to the weekly report of the department of agriculture. An active demand was expressed from dealers for the small remaining supplies of 1940 hops in growers' hands, but no sales were reported due to an almost entire lack of offerings.

Offers by dealers for this growth were reported as ranging from 26c to 28 1/2c per pound for growers, according to quality and size of lots.

There were no new contracts covering 1941 hops reported written in Oregon during the period, since both dealers and growers were reluctant to enter into commitments at this time because of the uncertainty as to outcomes.

In the absence of actual transactions, nominal values were placed at around 27c per pound for regular seeded types and about 40c per pound for seedless hops from the 1941 crop. Now crop prospects in Oregon are reported as most irregular. Trade reports indicate that definite damage has resulted already from the severe infestation of downy mildew in this state. However, it is not yet possible to estimate accurately the damage. Some yards are heavily infested, while the infestation is lighter in others. Infestation is spotted within the same yards. It is generally believed that the extent of damage cannot be estimated until hot, dry weather is received. Growers are still endeavoring to combat the mildew with approved spraying and dusting methods.

Washington markets also were firm. In the Yakima valley, sale of around 123 bales of prime quality 1940 hops was reported at 25c per pound net growers. Bidding was reported active for the few remaining spots in growers' hands. Only one carlot sized lot is left and only 300 bales in all remaining in that area, from the 1940 crop. All older crops with the exception of one or two small lots of 1937 hops have been sold. No further activity in new crop contracts reported.

Warm, dry weather last week checked the spread of mildew but further rains this week may increase the spread progress in spite of unfavorable weather. No sales or offers reported in the Puget valley area. The new crop is showing good growth there although considerable rain has been received. Downy mildew is reported rather serious in the cluster yards and some is showing in the fuggles.

California hop markets remained quite firm during the past week with light offerings from growers and fairly active demand from dealers and industries. Continued uncertainty

Stock Mart Down Again

Foreign, Domestic News Fails to Inspire Buying

NEW YORK, June 20 (AP)—The stock market backed away as speculative and investment forces were unable to find much buying inspiration in either the foreign or domestic news.

The Associated Press average of 60 issues was off 4 of a point at 41.4, putting the composite at just about where it started the week. It was the biggest drop for any session since May 22. Transfers of 356,070 shares compared with 459,590 Thursday.

Prominent stocks on the downward drift included US Steel, Bethlehem, Chrysler, General Motors, Douglas Aircraft, Westinghouse, American Can, Dow Chemical, Allied Chemical, Union Carbide, Du Pont, American Telephone, Kennecott, US Rubber, Santa Fe, Great Northern, Montgomery Ward and Standard Oil (N.J.).

Exceptions were Warren Bros. common and preferred which went to new tops for the year. White Sewing Machine preferred jumped 6 1/2.

Salem Market Quotations

(Buying Prices)

as to new crop returns in the coastal counties contributed to the strong market tone.

The New York hop market was quiet but firm with prices steady but unchanged. Buying continued in small lots for immediate needs. Foreign hops continued dull and nominal. On June 18, regular 1940 stocks were quoted to the trade at New York at 35c-37c; seedless nominal; and 1938 stocks at 18c to 20c per pound.

United States brewers used 2,468,129 pounds of hops and hop extract during March, 1941.

Rains Damage Valley Crops

OAK POINT — The rain has held up having here and has damaged the first crop of alfalfa some. Most of it is now in barns.

Clover hay, which was a heavy crop, is mostly in the shock and vetch and oat hay is ready to cut, but farmers are waiting for the weather to settle.

Cherry picking is on now at the McLaughlin hop ranch with about a one-fifth crop. Mrs. Hatie J. Black is picking with about a third of a crop compared to last year.

All spring grain is good with early spring sowed barley nearly ready to head out. The fall wheat crop is fine this year, also the gray oat crop.

Quotations at Portland

Produce Exchange

Wool Displays Firm Undertone For Week

BOSTON, June 20 (AP)—The Commercial Bulletin said today: "While the turnover in wool on Summer street or in the west has been negligible, there seems to be a better undertone to the market, due to inquiries concerning supplies of wool and prices on the part of those who might be interested to bid on the coming government orders. Prices made on sales this week are generally steady."

In the west, the few sales reported have been usually firm, although some wool has been sold at a slightly lower basis, here and there, especially average fine wool.

"Many manufacturers will have a backlog of orders running into the first quarter of 1942, with awards of government fabric presently. Mills are correspondingly indifferent to civilian business."

"Government officials last Tuesday in Washington took under advisement the appeals of growers' representatives for a higher differential in favor of domestic wools in government orders. "Mohair continues quiet but firm."

Father Complimented

BROOKS—Mr. and Mrs. Earl Streeter were hosts at a dinner recently honoring his father on his birthday anniversary. Guests were Mr. and Mrs. A. G. Streeter, Mrs. A. M. Dunlap, the hosts, and Zandra. A theatre party was enjoyed in the evening.

Winner of FFA Project Named

INDEPENDENCE—Bill Alderson, junior at the Independence high school, president of the local Future Farmers of America chapter, had his project selected as best by the judges this week.

It will be entered in the Willamette valley district Tuesday to compete with other high school students selected.

Bill's project includes one registered Jersey heifer, 110 Rhode Island Red hens, 185 Rhode Island Red pullets, five acres of hybrid corn, one acre of oats and one-half acre of kale.
