**Oregon Seed Production To Decline**  
PORTLAND, Sept. 2.—(P)—Oregon's seed production will decline this year despite an acreage increase, the marketing service of the department of agriculture said yesterday.

It estimated production of common rye grass seed at 22,000,000 pounds as compared with 27,500,000 last year. A drop in Austrian winter peas from 48,000,000 pounds last year to 30,000,000 was seen. Other declines were listed as purple vetch from 1,500,000 pounds to 1,100,000 pounds and Hungarian vetch from 3,650,000 to 2,700,000 pounds.

A damp spring stimulated vine, rather than seed growth, the service said, and rains during harvest caused chattering.

Increases, however, due to heavy acreage gains, were listed for hairy vetch, at 25,000,000 pounds, up from 24,000,000; Wilamette vetch at 7,200,000 pounds, up from 640,000, and English rye grass, 2,300,000, from 1,720,000.

### State Income Tax Payment Is Due Soon

Warning that the second half 1941 state income tax installments are due prior to October 1 was issued by the state tax commission here Tuesday. Filing of returns was due April 1.

The 1941 income tax payments are based on incomes for the year 1940.

Tax commission officials estimated that the second half installments would aggregate approximately \$2,000,000 as against nearly \$8,000,000 for the entire year. It originally was estimated that this year's income tax payments would total approximately \$9,000,000.

Penalty and interest will accrue on all income taxes which are not paid in full by October 1.

Officials said the 1942 income tax payments, based on incomes for 1941, should exceed those for this year, provided business conditions continue to improve. Income tax receipts are used to offset the property tax.
