**YOU DON'T HESITATE WHEN YOU NEED GLASSES**

**WHY SHRINK FROM HAVING DENTAL PLATES IF NATURAL TEETH ARE MISSING?**

**DR. PAINLESS PARKER** says:

"The reproductive quality of new transparent material used by dentists today assures you plates of realistic, lifelike appearance. Gums of matching, natural color and a crystal-clear palate add to the features of these new dentures."

**TRANSLUCENT TEETH**  
Simulate Natural Effects

The science of porcelain chemistry has recently announced new improvements and refinements in artificial teeth for dental plates. Translucent teeth have the three-dimensional quality of your own teeth and both absorb and reflect light. They bring to plates a "live," more vital look and make plates harder to detect.

*When eyes are affected*

People accept the decision when glasses are needed, and in most instances go immediately to have their eyes fitted. But in the case of infected or missing teeth, they put off visiting the dentist and suffer pain and discomfort as the penalty for delay, or false pride.

3 characteristics of transparent dental plates  
They are:  
One.—Light in weight, graceful in design.  
Two.—Time-tested for balance and strength.  
Three.—Hard-surfaced and easily cleaned.

Because of the ready adaptability of the material used in these plates dentists are able to fashion plates that serve individual needs as well as insuring a smooth, comfortable fit.

**Sympathy Honestly Felt**

TO US, each funeral we direct is a reverent ceremony—as much so as the formal service of an established church. We approach it with sincere sympathy for those bereaved, serving each family with kindness, courtesy and understanding.

THIS attitude is not adopted because we feel that it is required by our craft; a professional hypocrisy to be donned like a mask for a few hours, then put aside. Rather, it expresses a genuine desire to help those who need us.

WE hope never to lose this spirit; never to sacrifice it for mere routine efficiency, nor continue it solely because we selfishly find it to be "good business."

**LET'S LOOK TO JUNE!!**

Yes, June seems like a long ways away but the thing of prime importance NOW is WHAT KIND OF REPORT CARDS WILL YOUR CHILD HAVE IN JUNE.

Statistics prove that more than 20% of the children of school age are handicapped by faulty vision... with results that are obvious.

Be sure your child's sight is right by having it examined. Make report card time a happy time.
