Series Slows Stock Market

Buyers Quit Session To Watch Tickers on Baseball Score

NEW YORK, Oct. 2-(AP)-The stock market was doing all right until the second game of the world series started Thursday when many early buyers shelved commitments and adjourned to the news tickers to watch the

Virtually all the day's activity centered in oils and low-priced issues, the majority of which held to an extremely narrow range. Leaders generally were up fractions to a point or so in the forenoon. Advances then began to fade and volume dwindle. While modest gains were plentiful at the close, declines were widespread.

The Associated Press average of 60 stocks finished with a net loss of .1 of a point at 43. Transfers of 464.927 shares compared with 368,195 the day before.

Business news was viewed as fairly constructive and war bulletins generally were without disturbing qualities. A little bearishness cropped up, however, as Treasury Secretary Morgenthau was only a starter.

Western Union and Postal Telegraph preferred extended yesterday's upturn in the forenoon but slipped when profit selling came in on the "good news" that a senate committee had recommended legislation permitting merger of the telegraph systems. Previous strength of these stocks was apparently based on rumors such action would be taken.

International Harvester was off % of a point in the wake of announcement of further price boosts by this company. J. I. Case was up a shade but Deere, Oliver Farm and Caterpillar Tractors ended under water.

In the minus section were U.S. Steel, Bethlehem, General Motors, Chrysler, U. S. Rubber, Douglas Aircraft, Boeing, Anaconda, Du Pont, Johns - Manville, Owens-Illinois, Pathe, General Electric, Union Carbide and J. C. Penney. New lows for the year were posted for Westinghouse and Consolidated Edison.

Ex-Rickreall Man Dies at Kelso

RICKREALL - Word was received here Wednesday of the death of Thomas D. Dempsey, 79, at Kelso, Wash., with burial at Kelso Thursday.

Dempsey was well known here, coming here in the late 70's, and making his home here until 1907. He was one of the first in this community to plant hops as an

A brother, Frank, resides at Harrisburg. Mrs. Mary Adams and Harry Dempsey are a niece and nephew, and a number of cousins reside in Dallas. He was a member of the Rickreall AF & AM, being initiated

Spinach and Radish **Experiments Bring** Harvest Difficulty

LEBANON-Spinach and radsh seed have been raised commercially in this vicinity this season for the first time, and the growers are not enthusiastic about the work or the results. Of four who set out several acres for the seed, only one has expressed any idea of trying it again.

The first difficulty with the spinach is the trouble in getting pure seed. Buckwheat seed is so much like the spinach that there is likely to be buckwheat in the seed. This means greatly increased cultivation and reduced grade on the delivered crop.

Another difficulty was with the threshing. Most of the threshing outfits here could not handle the crops at all. The radish seed is small, round, hard and heavy; the spinach seed, large, light and rough. Some machines could be adjusted to one and not to the

So far the growers have not received reports on their deliveries and can not definitely compare returns of the new crop with returns from the crops ordinarily grown here

THE LONE RANGER

By Quinn Hall Seed Growers | Market Prospect Good for State Largest Wool Have Trouble Poultry and Dairy Products

An unusually favorable market outlook for poultry and dairy products and for meats and wool during the 1941-42 marketing season is indicated by a report just issued by the Oregon

agricultural extension service, The report also points out that farm labor and other costs have advanced materially during the past year and may be expected to increase further, although gains made in farm prices for eggs milk, meat, and wool have been more rapid.

The longer-time outlook is problematical, as animal numbers are increasing and much uncertainty exists as to the duration of the present extremely high level of consumer purchasing power: One indicator of the current strength of consumer purchasing power is the record high level of industrial production, already 60 per cent year.

Wheat Market **Shows Losses**

with net losses for the first time in the last ten market sessions.

Other grains also were lower, part of the weakness being due to a sharp break of soybean prices, which finished 1%-1/2 cents below previous closing levels.

Wheat rose about 1/2 cent early in the day due largely to scattered mill buying, but, when this was absorbed, gains were erased quickly. After holding fairly steady for a couple of hours, the market weakened late in the day and closed %-% lower than Wed-\$1.271/4-1/8.

Corn closed 1/8-3/8 down, December 81%-%, May 86%-87; oats 1/8 + 1/8 down; rye unchanged

Spends Week at Beach PIONEER-Mrs. John Keller, Dale Slater.

greater than before the European war started. Addit al strength is given to

for more milk, meat, and eggs in cific coast. the food-for-defense program. These conditions have helped boost form prices for dairy products 35 per cent since the war started, meat 56 per cent, eggs and chickens 30 per cent and wool 62 per cent. Further increase in the level of industrial production appears probable within the next

The demand for milk products is being emphasized by the government, particularly, to supply consumers in this country and for shipment to England, and much more meat and eggs are wanted in CHICAGO, Oct. 2-(P)-All 1942. Although prices for feed are wheat contracts Thursday closed higher than a year ago, the total supply of feeds in the United States is larger than last year and far above average.

The number of animals is enough greater to slightly more than offset the increase in feed supplies, especially of grain. Hay supplies in relation to livestock are as large as last year and near the record level.

With respect to beef cattle the report says that 'from a long-time viewpoint the outlook for cattle would be better if marketings in 1941-42 were heavy enough while nesday, December \$1.22%-%, May prices are high to stop the increase in numbers. Already there are enough cattle on hand to provide more beef and veal per capita than has been consumed for to % off and lard unchanged to many years, although not as much

The complete report which contains several charts and statistical jr., and daughter Phyllis Kay are tables may be had in printed form

Crime Trio Reunion

Show in US Opens

The largest wool show in the United States, which will open at the Pacific International Livestock exposition in Portland on October 4, is now in preparation at the Pacific Wool Growers. Fleeces from Ohio, Michigan, Wyoming and other eastern states the market demand for animal are in competition with the products by the government call cream of the crop from the Pa-

> "Our show, the oldest in the United States, is now the pattern for the other wool shows which have sprung up at the various livestock shows throughout the country," said R. A. Ward, general manager of Pacific Wool Growers under whose auspices the show is put on.

> "One feature is the 4H club wool show in which members of the 4H clubs of the northwest compete in two shows-a show for registered purebred fleeces grades. This has stimulated interest in better fleece production to the point that the show is now as large or larger than the wool show of adult producers" continued Ward.

Methods of Slug Control Told **By Official**

DALLAS, Oct. 1-Slugs are apparently more numerous this year and more generally found on farms than a year ago, reports W. C. Leth, Polk county agent. Because of the numerous inquiries concerning recommended control practices Leth suggests that baiting with metaldehyde as a quarter century ago." This is calcium arsenate bran bait be in line with the food-for-defense followed. Approximately 10 pounds per acre of this material goals for Oregon. should be used and it should be

applied only to the infested area. It is not necessary to cover envisiting at Ocean Lake this week from county agents or direct from tire fields but only the portions with Mrs. Keller's sister, Mrs. the college, free to citizens of Ore- of them where the clugs can be found. Many growers do not

know how to locate slugs and to find out if they definitely are present. Leth suggests that one of the easiest ways is to secure some of this poison bait and make marked deposits of it and refer to these during the following day or two. The presence of dead slugs near the bait deposits will give a good idea as to the extent of infestation.

Where it is possible, cultural practices may also be of some help in combatting this pest. Frequent tillage operations, includ-ing rolling should be of material benefit in ridding cultivated areas. Slugs are usually found where soil is quite cloddy or where quantities of plant debris are available.

Fair weather should be selected for the distribution of the poison bait in view of the fact that rains spoil any bait subjected to it.

Tokay Grapes Advance

PORTLAND, Oct. 2-(AP)-Slackening supply of local Concord grapes caused a fractional price increase to 50-60 cents lug on the East Side Farmers' Wholesale a show for commercial market Thursday. The cleanup was quick. The Dalles Tokaygrapes were around \$1.20 lug.
