Ten County Meetings Slated To Discuss Production Program

Marion Agriculture Goals Listed Butter License Revoked In "Food for Defense" Program; Revocation of the license of Edward D. Conley, Portland, to grade **Committee to Query Farmers**

Marion county's part in the 1942 far mproduction campaign providing for a complete mobilization of American agriculture will be explained in a series of 10 meetings, Robert E. Rieder, acting county agent announced Tuesday.

County goals and the necessary adjustments to meet them are to "Strictly Private" be discussed by the farmers as

Silverton, October 25, 1:30 p.m. Mt. Angel, October 27, 8 p.m. Stayton, October 25, 8 p.m. Jefferson, October 30, 8 p.m. Gervais, October 28, 8 p.m. Woodburn, October 30, 8 p.m. St. Paul, October 27, 8 p.m. Salem, October 30, 8 p.m. Central Howell, Oct. 29, 8 p.m. Turner, October 28, 8 p.m.

Under the program, which is not compulsory, Marion county's goals include: milk, 12,360,000 lbs.; milk cows, 1530; eggs, 308,-000; hogs (spring pigs), 500 brood sows; sheep and lambs, 5 per cent for slaughter; chickens, 16,562 for slaughter; turkeys, 19,100 for slaughter; flaxseed, 2500 acres, and gardens on every farm.

In explaining the new program which is proposed to adjust production to domestic needs for national defense and to the news of the nations resisting aggression, Secretary of Agriculture Claude R. Wickard said:

"Every farmer in the United States will be contacted by local farmer committeemen under the supervision of USDA defense boards and will assist with individual farm plans to determine the extent to which each farm can contribute to agriculture's task in national defense.

All over Oregon, county USDA agricultural defense boards have been meeting to map plans for Oregon's participation in this nation-wide food - for - defense program. The first of the 36 meetings started October 14, and all were scheduled to be completed by October 17.

At these meetings the members of the agricultural defense board and representative farmers and leaders have decided how much of the state's goal in the production of vital foods each county can assume.

After these county goals are definitely decided upon there will be another series of meetings to train a group of workers. These workers, consisting mostly of community AAA committeemen, will contact the individual farmers so that every farmer in Oregon will have the chance to enlist to do his share in this nationwide food-for-defense program.

Oregon's list includes an increase of 11 per cent in milk production to be accomplished in two ways. First, by better feeding and management, and second by an increase in cow numbers estimated at about 4.7 per cent. The question is how to get more cows on such short notice.

Those closest to the dairy industry say that can also be done in two ways. First, under present conditions it will pay to hold some cows in production which might normally be culled out and sent to the butcher. In the second place, statistics show that there are more than the usual amount of heifers on hand, which can be Berry Acreage Field Slugs brought into production for next

The next big requirement in the food program is more eggs. For Oregon the request is for 12 per cent more. Poultry leaders say that this can quite easily be accomplished in Oregon by operating present facilities nearer to capacity. They say that if existing laying houses are filled up, the increase may be obtained with very little additional cap-

Next comes cattle and calves for slaughter next year. The state USDA agricultural defense council believes that the marketings for slaughter can be increased by 16 per cent. They also are asked for a 20 per cent increase in spring a slight decrease is anticipated. Chickens for use as meat

Oregon is asked to increase its output by 9.8 per cent. Oregon is already an important turkey state. but it is asked to produce 10 per cent more this next year.

Certain counties are asked to produce more field corn next year. Oregon was asked for an increase of 150 per cent in flax seed output. The production of seed flax in this state has never been very profitable, but by in-creasing fiber flax by 50 per cent next year, it is believed the amount of flax seed wanted from Oregon will automatically

An increase of 2.6 per cent in ent, and an increase of 2 per cent for processing. The big rdens. The goal is 38 per cent more farm gardens than were raised this year. This means a farm garden on nearly every farm n the state if the goal is to be

Revocation of the license of Edbutter in Oregon was announced by the state agricultural department Tuesday.

Improper labeling of butter was given as the reason for the revocation. A hearing was held here recently.

Drop Foreseen Harm Crops In Oregon

Indications are that the Oregon acreage of strawberries for picking in 1942 will be 13,600 acres compared with 14,200 acres harvested in 1941, according to the agricultural marketing service.

Decrease in the important producing counties of Clackamas and Washington as well as some minor areas, is expected to more than offset the anticipated increase in Multnomah and Marion counties, resulting in a net decrease of 4 per cent for the state.

For the United States as a whole there are 204,190 acres of strawpigs. As to sheep and lambs, on berries in prospect for picking in the other hand, there has already 1842. This prospective acreage is been a rather heavy increase so 3 per cent less than the 210,930 that no more is expected. In fact, acres harvested in 1941 and compares with the 1931-1940 average of 179,520 acres.

> This prospective reduction in strawberry acreage for next season is largely the result of smaller acreages for the early and late groups of states. Acreages in the second early and intermediate states are expected to be about the same as the 1941 harvested acreage. Dry weather in many parts of the east has limited growth of strawberry plants, while in Washington and Oregon, weed following the excessive rains in

berries for market in the United crops harvested in other areas. States in 1941 totaled 14,283,000 crates compared with the 1940 increase of 2.6 per cent in crop of 14,314,000 crates and the bles is sought for fresh 1930-1939 average crop of 11,-

BRUSH CREEK - Local farmers are reporting more and more crop-harm done by field slugs this autumn. Especially are the pests disastrous in peas, vetch and clover fields. In many cases scores of acres have been completely wiped out.

In home gardens foliage from low growing plants has been completely stripped off, garden-

Rain has made baiting less successful and the work of the slugs more successful, growers say. On the drier nights, the pests do not work as much.

Early in the fall season, most of the baiting was done with a bran concoction. During the past week a new pellet poison has proved more successful.

Dehydrating Plant **Busy With Apples**

DAYTON - The Dayton de hydrating plant owned and managed by D. A. Snyder, started drying Rome beauty apples Monday, with eight women employed. The dehydrator has had an unusually busy season this year.

292,000 crates. A smaller producand grass growth has been rank tion in 1941 as compared with the previous season in the intermedate and second late groups of The commercial crop of straw- states more than offset the larger

Wool in Boston

BOSTON, Oct. 21—(AP)—(USDA)— The Boston wool market was more active. A number of inquiries were being received from manufacturers who being received from manufacturers who intend to submit bids for the new government order for wool goods. Many of these inquiries, however, were for options on wool. Sales included moderate quantities of graded three-eighth and quarter-blood combing bright wools at 50 cents, in the grease, and fine combing Delaine at 43-44 cents, in the grease. Some houses were moving fair quantities of spot Australian wools at firm to higher prices.

and to 50 cents lug. Cauliflower was generally 75 cents.

Beans were from 4 to 7 cents pound. Limas were 50-60 cents lug. Celery continued firm with Utah type \$1 and \$1.10 crate.

Brussels sprouts were 80-85 cents box.

In Demand

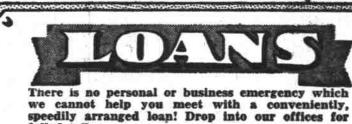

A hurry up call for 300 beet toppers for the Ontario district was sent to 23 state employment offices in Oregon, Tuesday, Director L. C. Stoll announced. The peak of the topping season is expected within two weeks.

"Use every means available to refer qualified workers," the state director instructed. More than 300 toppers are required.

Stoll said he probably would be able to divert workers from some other sections of the state where the harvests are completed.

Prices Unchanged on Wholesale Market

PORTLAND, Oct. 21-(AP)-Prices remained more or less unchanged on the Farmers' Wholesale market Tuesday. Volume was low as is usual on Tuesday, but demands was not heavy. Green broccoli was chiefly 55 cents dozen bunches and to 50 cents lug. Cauliflower
