Capt. Lipps is a graduate of Salem high school and of the US military academy; he is also a former student of Willamette.

Soon after his graduation at West Point in 1938, he was assigned to the army aviation schools at Randolph and Kelly fields for further training. After receiving his wings a year later he was assigned to Brooks field, Texas, as assistant instructor.

In March, 1940, he was transferred to Borinquen field, Puerto Rico, where he is now stationed as observation officer of a bomb squad.

FORT LEWIS, Nov. 12.—(P)—The recent ruling by the war department that regimental commanders must be under 56 years of age was responsible for the reassignment of duty of Col. Harry C. Brumbaugh, commander of the 162nd infantry regiment.

Colonel Brumbaugh, who took over command of the Oregon national guard in 1939, left his commanding post for a tour of special detail with the 4th army headquarters at the Presidio, San Francisco. He is 56.

Col. Brumbaugh entered the army as a private in 1903 and was a second lieutenant in the 3rd Oregon infantry when the regiment sailed overseas for service in the world war. In civilian life, he was assistant to the general manager of the Portland Electric company.

He came to Fort Lewis a year ago last September with his regiment when it was inducted into active service under his command. The 162nd infantry grew to be one of the best trained outfits in the 41st division.

### New State Hospital Building Plans Viewed by Control Board

Plans for the new \$325,000 combined medical center and treatment building at the Oregon state hospital, as far as completed, tentatively were accepted by the state board of control here Wednesday.

The structure will be two and three stories high, of light brick exterior, and will have a capacity of 120 beds. The plans are being prepared by A. E. Doyle and associates, Portland architects.

Gov. Charles A. Sprague declared that at first glance the exterior design appeared too drab and without outstanding character but added that with a few modifications it probably would reflect the present architectural era.

The necessity of avoiding too much diversity in state building design was stressed by State Treasurer Leslie M. Scott.

The architects contended that the exterior design was in line with outstanding construction in all parts of the country.

Both the exterior and interior plans received the approval of Dr. John Evans, Oregon state hospital superintendent.

J. Donald Kroker, Portland engineer, advised the board that he would report soon on the proposal to revise the heating system and provide proper ventilation in the legislative halls in the new state capitol building.

The 1941 legislature appropriated \$55,000 for this project.
