Stock Market Close Shaky

Tax Selling Causes Volume to Rise but Prices to Decline

NEW YORK, Dec. 20.-(AP)-The stock market Saturday finished another declining week slightly on the irregular side.

The Associated Press average of 60 issues was unchanged at 36 but showed a new loss of .9 of a point on the week. It was the fifth session in a row where the composite had registered no progress. Tax selling continued as a volume motivator.

Transfers of 628,550 shares compared with 629,310 a week ago and were the second largest for a Saturday since Dec. 28, 1914. The turnover for the week amounted to 6,771,252 shares against 9,-820,381 last week.

Gains were held by Bethlehem Steel, Santa Fe, Goodrich, Montgomery Ward, Douglas Aircraft, Kennecott, Standard Oil (NJ) Westinghouse, General Electric, Eastman Kodak and General Mo-

US Rubber preferred was an isolated weak spot, losing 51/2 points at 721/2, a new bottom for the move. American Telephone, Chrysler and American Can also were in the new low division.

Defense Program Exceeded in 1942 Winter Wheat Crop

WASHINGTON, Dec. 19-(AP)-A 1942 winter wheat crop of 630,913,000 bushels-or about 150,000,000 bushels in excess of the AAA production goals under the "food-for-defense" program -was said by the agriculture department today to be indicated, according to Associated Press re-

This estimate was based on factors affecting production which are measurable in the fall, such about 650,000,000 bushels comas seeded acreage, condition of pared with 945,937,000 bushels lated to yields in past years.

Because this year's record wheat supply of 1,348,000,000 bushels was sufficient to meet expected needs for nearly two years, the agriculture depart-

San Francisco Air Raid Siren

A huge siren, one of eight to be placed in San Francisco, is swung atop a platform on Twin Peaks, about 1000 feet above the city. This siren, seven others to be placed and three already in use are to be sounded simultaneously in event of air attack.

ment sought a greatly reduced

crop in 1942. Plans called for a combined winter and spring wheat crop of the crop on December 1, rainfall harvested this year. A sharply and temperature to date, as re- reduced spring wheat crop of 175,000,000 bushels next year would give a total crop of 806 .-000,000 bushels or 156,000,000 bushels more than the government's goal.

> Farmers themselves cooperated wholeheartedly with the wheat program, which called for a reduction of about 12.5 per cent in the seeded acreage. The 39,-318,00 acres seeded this fall to winter wheat was 14 per cent below the 45,633,000 acres planted a year ago.

The department said unusually avorable weather was the facor responsible for the prospecive overproduction. The December 1 condition of winter wheat was 87 per cent of normal, compared with 84 a year ago.

Present indications point to an average yield of 16 bushels per acre compared with 14.7 bushels this year and with an average of 11.8 bushels.

Officials emphasized that the indicated production might not be borne out, inasmuch as much could, happen between now and harvest time next June and July to lower prospects. However, past history had shown that when conditions were favorable in the fall and early winter, the crop usually turned out good.

Should production be about as indicated, officials said, it would be necessary to hold a grower referendum on marketing quotas.
One reason the department ought a reduced wheat crop was the fact that with present surpluses of grains, difficulty was being experienced in finding adequate storage facilities.

Pledges Show Aim

the Associated Press.

Compilation of reports from all 36 counties showed promises to produce types of food, feed and seed particularly needed for war efforts here and abroad. Milk, eggs and pork production will be exceptionally high.

Percentage increases planned for 1942 over 1941 included: milk 19 per cent; milk cows 18; hogs 38; eggs 36; sheep 10; beef cattle to be marketed 12; sugar beets 31; corn 7; barley 61; rye for grain 17; hay 9; dry beans 63; fiber flax 5; flax seed 10; ryegrass 18; winter legume seed 35; vegetables 13, and farm gardens 11.

The acreage of cover seed crops is being increased in Oregon, which Taylor said was the only state asked to make up the goal, to meet demands in the south where winter legumes will help make up the nitrate shortage.

Taylor said farmers would need priorities on crawler type tractors and electric motors, but all equipment was getting so scarce that speed in repairing machinery and ordering necessary parts and new equipment was essential.
