By WHITNEY MARTIN  
NEW YORK, Feb. 24 (Wide World)—A note to everybody's hero:  
Private Joe Smith.  
Foxhole,  
Somewhere on Bataan.  
Dear Joe:  
We've been hearing all about you fellows over here, and the way you are winning events in those mechanized Olympics fairly makes us pop our vest buttons in pride. You've won everything but the backward race, and I know you aren't entered in that.  
It just occurred to me that you might like to know what's been going on back here in the sports world, as I know the newspaper carrier service probably isn't so good there, and anyway, you haven't had much time to do any reading, what with the Japs ready to crawl all over you like beetles every time you try to catch a cat-nap. Japanese beetles, eh, Joe?  
Anyway, the weather here—well, it's February, Joe, and you know what that means in New York. The baseball clubs have gone to their camp, and we're getting pictures and news stories along the same old line, and

notations that so-and-so is classified 1-A or 4-F or one thing or another. The Dodgers are back in Havana. All but Kirby Higbe, who wouldn't leave Miami unless he could take his wife along. Did they let you take your wife along over to Luzon, Joe? But of course you're not just training.  
Nobody seems to know just what to expect of the baseball races, although everybody is picking the Yankees again. I'm picking the Yankees, too. You Yankees over there. The Dodgers have a bunch of old men and are going to be tough again, as not many of them will be joining you fellows right away. You knew about Hank Greenberg and Hugh Mulcahy, of course. Bobby Feller is not in, which means the Indians aren't in. Aren't in the first division, that is.  
Joe Louis had another fight. Against Buddy Baer, and it lasted about as long as a sneezing spell. No need tell you who won. Joe is private Joe now, and is making just as good a soldier as he is a champion. He risked his little for nothing, which shows what kind of a guy he is.  
There's another dark-skinned fighter around who is going great guns. Name is Ray Robinson, nicknamed Sugar. He just won his 117th straight fight, including his 28th as a pro. He's sort of a light welterweight, and he'll be a champion one of these days.  
We've had some fine track meets. Les MacMittell has been winning right along, and

## East Studies Oregon Farm Labor Plan

CHICAGO, Feb. 25.—(AP)—An army of rookie harvest hands—school boys and girls, women and business men—may be recruited to help gather the nation's wartime crops this year.  
That possibility arose Tuesday at an 11-state conference of farm placement experts confronted with what one conferee called "a definite farm labor shortage" in 1942, when the United States needs its maximum harvest to assist in feeding the anti-axis allies.  
The "Oregon plan" and the "Goodhue (Minn.) plan" were discussed as capable of widespread adoption.  
In Oregon school children from the seventh grade up have been registered this year for possible work in the fields and there has also been a house-to-house canvass throughout the state of every available worker. Officials of that state believe that with this emergency labor supply the Oregon harvest can be brought in without the customary migratory forces.  
In Goodhue, Minn., a village of 480, business men of the town, high school students and housewives voluntarily registered to do farm work if needed.  
Pay W. Hunter of Washington, chief of the US employment service's farm placement section, declared a farm labor shortage was unavoidable but "no one, in my judgment, knows exactly how great it will be, just how many of the average of 11,500,000 farm workers will not be available this year."  
He said the problem must be solved on a state-by-state basis because of varying and rapidly changing conditions. Employers of farm labor, he added, may have to take family men when they want single men; negroes when they customarily hire white men; women and children instead of male, adults.

## Control Board Orders Changes In Capitol Ventilating System

Correction of the ventilating system in the state capitol legislative halls and the large groundfloor hearing room and installation of new heat control thermostats throughout the building, were approved by the state board of control at a meeting here Wednesday.  
This is the first definite step in the program to air-condition a large part of the state capitol building under a \$55,000 appropriation of the 1941 legislature.  
Roy E. Mills, board secretary, reported that any further improvement of the ventilating conditions at this time would require a large amount of sheet iron and other materials which are now subject to government priorities. He said Washington officials indicated that it would not be possible for the state to obtain these priorities under existing regulations.  
Board members were agreed that in changing the heat control valves fuel consumption would be reduced materially. Plans for the initial improvements will be completed as quickly as possible.  
Warden George Alexander of the state penitentiary informed the board that the population at the institution had been reduced from the peak of 1117 in 1907, 1908 to 980. Approximately 100 former inmates of the prison are now employed in the Portland shipyards, he said.  
The board authorized the purchase of approximately 40,000 gallons of lubricating oils and greases with the Standard Oil company receiving the bulk of the contract.  
Approval also was given a request of the state board of health for additional space in the Oregon building in Portland, in order to safeguard its vital records and speed up the issuance of birth certificates which are now in great demand.  
The new space includes a vault with a total rental of \$600 a month.
