Syneta Beetles Cause Damage In Orchards

Cherry growers who have been unable to spray for the control of brown rot blossom blight disease and syneta beetle should make every effort to do so since most of the petals are off, states Robert E. Rieder, acting county agent.

The syneta beetles have been emerging from the ground now for about 10 days and are causing considerable damage by their feeding on the buds, blossom stems and developing fruit.

Rieder says that they can easily be controlled with a lead arsenate spray composed of four pounds of lead arsenate to 100 gallons of water to which is added two pounds of hydrated lime. Satisfactory control of syneta beetle may also be obtained by the use of a dust containing lead arsenate, 20 or 30 pounds, and lime, 70 or 80 pounds, applied at the rate of 30 or 40 pounds per acre.

Some of the commercial dusts contain some sulphur which is added to the lime and the arsenic and which may be of some value in helping to check brown rot. The blossom blight stage of brown rot disease is spread by rains during blossom time and is now present in most orchards waiting for a chance to be spread to the fruit by rains which may occur during the rest of April.

A spray of bordeaux, 3-3-50, applied when most of the petals are off is effective in checking the spread of this blossom blight disease. To this spray can be added the lead arsenate spray mentioned above for the control of syneta beetle. If the lead arsenate spray is added to the bordeaux spray the additional two pounds of hydrated lime needed in the arsenic spray when applied alone is not necessary, Rieder says.

Ontario Calls For Thinners Of Sugar Beets

An SOS for 1000 sugar beet thinners at Ontario has been received at the Salem office of the US employment service by W. H. Baillie, manager.

Blockers and thinners will receive $9.50 an acre, about $2.50 over last year, Baillie said. In some cases transportation will be furnished to Ontario and most of the growers provide camping facilities. Workers need their own bedding and cooking utensils.

Cane Disease Control Told

The control of leaf spot disease on cane fruits is affected by an application of a bordeaux 3-3-50 spray applied when the new leaves are just out in the spring on the canes of the fruits such as boysenberries, loganberries, youngberries and blackberries, announces Robert E. Rieder, acting county agent.

Rieder says that this disease attacks both the leaves and the canes and very often the fruit of these plants.

Many growers, with the prospect of a little more income from their fruits this year, have been asking about this spring application for the control of leaf and cane spot. Rieder has assured them that it is a beneficial spray to apply to prevent the new spring infection of this disease.

Legal Notice

IN THE DISTRICT COURT OF THE UNITED STATES FOR THE DISTRICT OF OREGON

In the Matter of Elfin Fayhe Ross, Bankrupt.

No. B 26913

To the creditors of Elfin Fayhe Ross, of Salem, in the County of Marion, and District aforesaid, a bankrupt:

NOTICE IS HEREBY GIVEN that said Elfin Fayhe Ross has been duly adjudged a bankrupt on a petition filed by him on the 4th day of April, 1942, and that the first meeting of his creditors will be held at Room 225, in the United States Postoffice Building, Salem, Oregon, on the 4th day of May, 1942, at 2:00 o'clock in the afternoon, at which place and time the said creditors may attend, prove their claims, appoint a trustee, appoint a committee of creditors, examine the bankrupt, and transact such other business as may properly come before said meeting.

Dated at Albany, this 18th day of April, 1942.
WILLARD L. MARKS
Referee in Bankruptcy.
Apr 21-1942.
