Cent a Bushel Gains Recorded as Buying By Dealers Opens

Upward

CHICAGO, Aug. 29-(AP)-The wheat market took another hitch toward recovery Friday with gains of about a cent a bushel that lifted quotations more than 3 cents above the week's low to the best levels in a month.

Renewed buying attributed to commercial dealers, mills and traders operating through commission houses accomplished the unturn in the face of only light hedging sales in connection with the new spring crop movement.

Brokers said war news and a belief that new price control measures will be flexible rather than rigid contributed to the market's strength. Wheat closed 5"7-7"8 higher

than yesterday, September \$1.19 1/2-%; ecember \$1.23 %-1/4.

Rural Harvest Of Scrap Set

A statewide "scrap harvest," designed to produce Oregon's share of the scrap metals needed to keep America's war industries rolling, is scheduled to start September 7, Robert B. Taylor, chairman of the state USDA war board, announced this week.

Although 70,000 tons of scrap iron have moved from Oregon farms since Pearl Harbor, war board surveys show that at least that much more remains on farms, Taylor said. Much of the remaining scrap is largely in remote places and will be more difficult to get.

Every farmer will be contacted during the coming drive, which will be-jointly directed by farm implement dealers, county USDA war boards, and county salvage

The program will be inaugurated in each county by the chairman of the county war board, the chairman of the salvage committee and the county agent. A meeting will be held in each instance to be attended by members of the war board and representatives of

the county and state salvage committees, who will make final detailed plans suited to each county
