Apple Prices To Be Raised

SAN FRANCISCO, Sept. 2—(AP) Apple processors will be permitted to increase their maximum prices for canned apples, applesauce, apple juice, cider and dried apples under a forthcoming price regulation, the office of price administration announced Wednesday.

The price adjustments will cover increased raw fruit and other costs and follow modifications of the ceiling prices for other canned and dried fruits. "The new regulation," OPA said, "will establish a fixed price for dried apples at 19 cents per pound for US grade A and B on the Pacific coast—that is, the states of California, Oregon, Idaho and Washington—and 17 1/2 cents per pound for US grade C. These prices are for 1942 pack in 25-pound or 50-pound wood boxes. Dried apple prices in the eastern states are to be 2 cents higher than those established for the Pacific coast area."

OPA said this differential was desirable to encourage drying of apples in eastern areas so that unusual military demands may be met.

Rains, Frost Slow Oregon Harvests

PORTLAND, Sept. 2—(AP)—From below freezing to above 90 degrees was the temperature range in Oregon last week, the weather bureau reported Wednesday.

Light rains fell over most of the state, delaying harvest of the small amount of grain left in the fields. Corn, somewhat late, made good progress. The prune harvest also was delayed.

Peach and Bartlett pear harvest continued with generally satisfactory yields, although some frost damage was reported in Rogue river valley pears.

Hay, legume and grass seed harvests continued with some delay because of the rain. Despite the precipitation, irrigation was necessary in dry land areas. Unirrigated pastures were dry and some green feed was used. Livestock condition, however, was reported to be good.

Flax hauling continued, as did hop picking. Shipment of early potatoes was nearly completed in eastern counties. That region is planting fall lettuce, with good germination reported.

Some frost damage to vegetables was reported from higher areas.

Peach Harvest Starts This Week

UNIONVALE—Eberita canning peach harvest started Monday at the C. J. Countiss farm when by going over the orchard one box was gathered to fill a special Portland order.

If present weather continues the pickers will be at prime by September 5, he states. Regular price for this season is asked.

Oregon Sands Hold Minerals

PORTLAND, Sept. 2—(AP)—The black sands on southern Oregon beaches contain many strategic minerals in quantities which would make commercial mining profitable, the federal geological survey reported.

Recent studies have indicated presence of chromite, ilmenite, magnetite and zircon, the bureau said. It disclosed also that "methods of separating these economic minerals from Oregon beach sands have been developed, and the Krome corporation now is erecting a mill to treat 200 tons of ore daily."

Reserves of 1,400,000 long tons of sand averaging 5 and 9 per cent of chromic oxide and as much as 1 per cent of zircon were found in coastal terraces representing ancient raised beaches. Present beaches are estimated to contain 90,000 long tons of sand averaging 5 per cent of chromic oxide, the bureau reported.

Drouth Threat Ends

GRANTS PASS, Sept. 2—(AP) Danger of drouth this summer ended this week in the Rogue river district as the peak of the irrigation season passed with water still at a satisfactory level.
