Contrasting Fabrics Make Frocks Warm, Smart

Left, dress with contrasting yoke and panel; center, frock with plaid sleeves and yoke; right, quilted dress in two fabrics.

You can achieve warmth and smartness this season if you make some frocks for yourself at home. You can also give first aid to the budget and make clothes according to WFB if you reduce the total yardage of the dresses by making use of contrasting salvaged fabrics for yokes, sleeves, plastron and panel front trimmings. The shoulder yoke, sleeve and panel of the frock on the left above were whipped up from salvage material, while a little over two yards of new fabric were used for bodice and skirt. A minimum of new fabric also is used for the model shown center, with the Peter Pan collar. It has a sleek fitting bodice and swirling pocketed skirt, with salvaged plaid material used for shoulder yoke and full bishop sleeves. The quilted costume, right, has a reversible dirndl skirt quilted on the right and wrong sides to point up the versatility of the changeable two-fabric skirt. One fabric is plain to match the vest, the other printed to provide contrast.

Morale Hinges On Right Salt

"Your diplomas," said the assistant commander of the 104th Timberwolf division, "aren't worth a darn."
