The OREGON STATESMAN, Salem, Oregon, Wednesday Morning, April 28, 1943

# Market Has **Slow Session**

Price Hesitancy Is Deterrent; Stock Average Is Same

NEW YORK, April 27-(AP) Price hesitancy was the rule Tuesday in one of the slowest stock market sessions of the year.

The Associated Press average of 60 stocks was unchanged at 48.9 for the second day in a row. Transfers of 827,870 shares compared with 1,125,305 Monday and were the second smallest for a full session since Feb. 8.

First quarter revenue figures for the principal railroads revealed improvement over the like period a year ago but it was suggested that the recent climb of carrier stocks possibly had partially discounted the income re-

U. S. Steel, lower most of the time, managed to emerge with a gain of 1/8 at 551/4, and directors. after the close voted a payment of \$1 on the common, same as disbursed previously, and revealed net for the first three months of \$1.04 a share against \$1.01 in the same 1942 quarter.

Among a smattering of new year's tops were those of Stanphone and United Stores "A".

Reorganization rail bonds pushed upward on relatively large vol-

### Quotations at Portland

## Incentive Payments Still Made For Potatoes, Vegetables

Marion county farmers who are increasing production of potatoes and fresh vegetables to meet critical wartime demands are assured by W. M. Tate, chairman of the county AAA committee, that incentive payments will be made for those two crops as previously announced.

The program for potatoes and truck crops is not involved in the recent action of congress on incentive payments, W. M. Tate declared. The funds for potato and The program for potatoes and vegetable incentive payments are already available, and payments

confused by reports that congress had rejected incentive payments in acting on the agricultural appropriations bill. Potate and vegetable payments are not affected, and will be made as announced to compensate growers for the higher cost of the extra production needed.

The payment for potatoes will be 50 cents a bushel on the normal yield on the acreage between 90 grades are: Patricia Smith, Joan and 110 per cent of the farm goal. Payments of \$50 an acre Pauls and Harold Kufner. will be made on the same basis for carrots, snap beans, lima beans,

and green peas for fresh market. Along with dry peas, dry beans, and flaxseed, potatoes and vegetables are on the list of important warcrops for which increased grades. plantings are needed to meet war requirements. Growers who are grades will have their play day set up to grow more of these crops Friday. This year they will stay are urged to do so.

The chairman said that more dry beans aspecially are needed. This is one of the few crops where intended plantings, as pledged by farmers during the recent farm mobilization drive, do not measure up to the state's 1943 war production goal. Favorable returns are assured, as the government will support the price of beans at \$6.50 a hundred pounds. ....

### By Quinn Hall Tate Clarifies Pressure Cooker **Rationing Plans**

A ration program to allocate this model pressure cookers being made this year is being organized through the county farm rationing committee, W. M. Tate, chairman of the county USDA war board, announced yesterday.

A subcommittee of five women who are leaders in the home eco- mittee. nomics field is being set up to assist the county farm rationing committee. This subcommittee will review all applications and determine who is eligible for a new pressure cooker.

Dates when applications will be everyone who wants a pressure cooker will have a chance to apply, Tate said. Neither the pressure cooker nor the application forms are available now. Because demand for the cookers

is expected to greatly exceed the supply, rationing will have to be on the basis of greatest use in home canning of vegetables re- the breeding. quiring pressure cooker processing. For that reason, more consideration will be given to applications from "neighborhood pools" and organizations. At least six families should be able to use one pressure cooker, and sharing agreements of this kind will be required for most applications.

The pressure cookers will be made with enameled steel bottoms and tinplated steel tops. Most of them will be the seven-quart size, with a few in the 14-quart size.

The chairman expects that complete details of the rationing program will be announced next
