#### 'Notch' in Tax **Bill Smooths Out Inequity**

WASHINGTON, May 31 -(AP) A "Notch" provision for the protection of income taxpayers oweing the government slightly more than \$50 was explained Saturday in a joint senate-house conference committee's report on the pending pay-as-you-go tax collection bill. To put taxpayers on a current basis, the bill provides for cancellation of 75 per cent of the 1942 or 1943 income tax liability (whichever is smaler) of the amount is more than \$50, and for complete cancellation of the lesser year's tax if \$50 or less. However, it was foreseen that this would result in inequities in cases where the liability was just above \$50. For example, a man owing \$52 would have to pay 25 per cent of it over the next two years, or \$13.

To eliminate the difficulty, the conferees provided that the additional tax to be paid shall be 25 per cent of the lesser year's tax, or the excess of the tax liability over \$50. The \$52 man, then, would have to pay only \$2 additional.

The measure is expected to be called up for final approval next week, first in the house, then in
