### **Irregularity** Holds Market

Rails, Specialties Go to New Highs

NEW YORK, July 24-(P) While rails and specialties continued to climb to new highs for the past 3 to 6 years in Saturday's session, the stock market generally failed to shake off irregularity which prevailed throughout the week.

The rail section got a brisk start on the upswing Wednesday and maintained a full head of steam during the remainder of the week. Net income figures and forecasts of big post-war traffic helped the transportation section. Utility preferreds reflected rising earnings for the power and light companies as well as break-up plans under the holding company law expected to favor shareholders.

The Associated Press 60-stock average was unchanged today at 52.8 and on the week showed a net loss of .2 of a point. The short session, though, witnessed a runup of .2 of a point in the 15-rail composite to 27.4, highest mark since October 6, 1937. Transfers totaled 387,060 shares compared with 397,040 a week ago.
