# 'Peace Nerves' **Attack Market**

Stocks Lose Ground For Third Day in Row Despite Good Returns

NEW YORK, July 28-(AP)-The stock market suffered another attack of "peace nerves" Wednesday, losing ground for the third successive session, but ending on a note of irregular recovery.

The Associated Press average of 60 stocks showed a closing deline of .3 of a point at 50.2. The industrial component was down .7 while the rail index was up .3.

Drop in the major average brought the overall loss since Monday to 2.6 points, about the widest 3-day reaction since the market started on the uptrain in April of last year.

Transactions of 1,847,990 shares were the largest since May 10 and compared with yesterday's 1,786,-

Wall street continued to have conflicting ideas on the implications of the chage of government in Italy and this confusion was heightened by today's reports of serious disorders in Milan.

Earnings statements of several big corporations, covering the June quarter and the half year seem to have little effect on the related stocks although the figures were favorable.

Some brokers thought the market might have received more effective support except for the unwillingness of certain prospective buyers to act before President Roosevelt's radio talk to the nation Wednesday night.

Connector of the "grouses" that workers toss off more or less from habit . . . and maybe just by way of passing the connector of the "grouses" that workers toss off more or less from habit . . . men will hear it next.

But, by and large, a e small scales over which ma... a man woman's and child's wages are poured in harvest season, are giving accurate weight. This is the word of the weights and measures officials of the state department of agriculture, which is official tester and inspector of all kinds of scales used in Oregon.

That doesn't mean some incorrect - weight scales haven't been found, but they are few and far between and, fortunately, in the few serious instances found to date the scales have been checked before the picking season started. Faulty scales are, of course, condemned until satisfactorily repaired. The harvest helper who finds the state scale seal-a round aluminum tag-attached to the scale may be assured that there is honest return for the day's labors. Crop owners want it that way, too.
