

# Wheat Rises; Oats, Rye Drop

Buying Aggressive In Bread Cereals; Other Grains Slow

By WILLIAM FERRIS  
CHICAGO, Aug. 6 (AP)—Divergent trends developed in grain pits Friday, wheat advancing as much as a cent on fairly aggressive buying while oats and rye declined fractionally in a sluggish trade.

Indications the Commodity Credit corporation had purchased 2,500,000 bushels of wheat at Minneapolis in the last few days, an increase in mill buying and strength at Winnipeg combined to give firm undertone to the bread cereal. Final prices were only slightly under the day's highs. At the close wheat was 1/4-1 cent higher, September \$1.45 1/4, December \$1.47-1/4, oats were 1/4-1/2 lower, September 70 1/2, and rye was down 1/4-1/2, September \$1.02 1/4-3/4.

Purchases of wheat by the CCC now total around 4,000,000 bushels, according to trade estimates, and the agency reportedly is endeavoring to get more grain at Minneapolis, Omaha and Kansas City. It is understood that all of this wheat will be utilized to augment the agency's feed wheat stocks.

The Modern Miller, a trade publication, asserted the government's program of using wheat for feed "is meeting with unusual success and latest estimates suggest that 300,000,000 bushels may be fed this year, or 50,000,000 bushels more than anticipated a short time ago."

Increased federal-state shipping point inspection fees were announced here Thursday by Director E. L. Peterson, state agricultural department.

The inspection fee is boosted 1/2 per cent on apples, pears, prunes, fresh berries, celery, cherries, tomatoes, peas, mixed fruit, cabbage, beans, peaches, bulbs, carrots, garlic, parsnips, mixed vegetables, lettuce, brine cherries and cold pack goods.

The new inspection fee schedule increase for dried fruit is 15 cents per ton, potatoes, one-fourth cent per 100 pounds, onions and onion sets, one-half cent per 100 pounds, and walnuts and filberts 1 1/2 cents per 100 pounds.

There also is a slight increase for truck lot inspections and for inspections requested at points more than 5 miles distant from shipping point offices.

These new rates approximate a 55 per cent increase over the rates in operation in 1937.

**SF Labor Shortage Hits Willamette Valley Lamb Farms**

GOLD BEACH, Aug. 6 (AP)—Manpower shortage in San Francisco slaughterhouses is leaving 10,000 marketable lambs crowded into Curry county pens, County Agent A. M. Knox reported Friday.

Pasturage in Willamette valley farms looks insufficient for the overflow lambs, Knox said. Owners had hoped to ship the lambs to farmers until the San Francisco slaughterhouses can accept more shipments.

The county agent attributed the bottleneck to War Food administration slaughter quotas as well as to labor shortage.

# Stocks Decline; Trade Sluggish

Selling Runs Only Slightly Ahead Of Thursday's Low

By BERNARD S. O'HARA  
NEW YORK, Aug. 6 (AP)—Stock prices declined generally Friday but selling lacked urgency and the market was only a little more active than on Thursday.

Fractional losses were widespread and a few leaders fell back more than a point.

The pace of trading ran behind Thursday's quiet dealings much of the time and volume for the full five hours amounted to 614,920 shares against 541,630 that day.

The improved earnings of a number of companies attracted but momentary interest. Paramount Pictures, for example, was ahead for a while on a six-months net of \$1.97 a share against \$1.88 in the 1942 period but closed 1/4 lower at 25.

American Telephone found little support and lost 2 1/2, closing at 152 1/4. Other favorites down a point or so included Chrysler, off 1 1/4; Santa Fe, off 1 1/4; United Aircraft, off 1, and Owens-Illinois, off 1 1/4.

The Associated Press index of 60 stocks dropped 4 of a point to 49.1, and of 825 issues dealt in, 437 were lower.

Lagging most of the day, and behind at the close, were US Steel, Bethlehem, General Motors, US Rubber, Goodrich, Montgomery Ward, International Harvester, Western Union, Consolidated Edison, Standard Oil (NJ), Texas

# Hop Growers Sign Pickers

By the Associated Press  
Oregon hops made good progress under favorable weather conditions during the week ending August 4, but trading was virtually at a standstill, the War Food administration reported Friday.

If any contracts were written they were not reported, and it was evident, WFA said, that growers were awaiting further crop and market developments before entering into more commitments. Most growers have contracted at least a portion of the 1943 crop on the basis of ceiling prices at the time of delivery or on December 31.

Light rains at week's end aided crop growth, particularly in upland regions. The crop was reported unusually free of mildew and other infestations.

Growers still attempted to sign pickers for the early varieties as harvest time neared.
