

## Favorites Rise On Exchange

### More Than Million Shares Change Hands On Lively Market

By BERNARD S. O'HARA  
 NEW YORK, Sept. 20 (AP)—Blue chips were the principal climbers in today's fifth successive average rise of the stock market.

In the first better than a million-share session for nearly two weeks, industrial favorites were well out in front at the start. Parfait taking on the run-up, however, stemmed the push after midday and early plus marks running to two or more points were reduced or converted into losses in some cases at the close.

Further inspiration for the extension of last week's recovery was found in cheering news from virtually all battlefronts. The successful government bond drive also was a prop for sentiment, as were business developments and hopes for constructive congressional legislation on taxes. Peace stocks were selectively popular although armament issues were able to hold their own in most instances.

The Associated Press 60-stock composite was up 2 of a point at 51.6. It was one of the broadest markets since late July, 926 individual issues being traded. Of these 500 were up, 219 down and 207 unchanged. Transfers of 1,098,320 shares were the largest since Aug. 3 and compared with 694,155 in the preceding 5-hour stretch.

The sale of a stock exchange seat for \$41,000, up \$1000 from a preceding transfer was a pleasing indicator for the brokerage fraternity.

Bonds were steady. Cotton was ahead 20 to 59 cents a bale.

In the curb modest advances were posted.

## WFA to Stabilize Fluid Milk Sale

The war food administration is working on a plan to prevent further increases in fluid milk consumption by controlling fluid milk sales. American consumers are using more fresh milk and cream than ever before—20 per cent more than 1941 and 12 per cent above last year.

This record consumption is increasing at the rate of about one per cent a month, resulting in a steady decline in the amount of milk available for production of butter, cheese, evaporated and dried milk.

Total milk production through July was about the same as last year's record output—almost 10 billion pounds more than 1940. WFA emphasizes that the contemplated control plan is aimed at stabilizing fluid milk consumption, not reducing it below recent levels.

## WFA Administrator Says More Will Eat Less During 1943

"Those who have always had an unlimited supply will eat somewhat less — and many who in peace time could not afford so much will now eat somewhat more." This is the way War Food Administrator Marvin Jones interprets 1943 farm production in terms of civilian food supplies.

Total food production is now expected to exceed the record 1942 output by 4 per cent, and the 1935-1939 average by 31 per cent. It will be divided about as follows: US armed forces, 13 per cent; US civilians, 75 per cent; lend-lease to England, Russia and other United Nations, 10 per cent; US island possessions, 2 per cent.

## Buy A Bond—Get Your Free Ticket

You have to buy a bond to get in to see Wallace Berry and Marilyn Maxwell at the Elmore tonight in "Salute to the Marines." They're birds of a feather, these two, both stuck on the marines in the technicolor film. Berry, as Sergeant Major Bill Bailey, has been in the service 20 years, and his daughter, played by Miss Maxwell, admires him for every day of it.

## Grain Market Interest Lags

### Closing Prices Down Fractionally; Lack of Strength Disappoints

By WILLIAM FERRIS  
 CHICAGO, Sept. 20 (AP)—Interest in grains was slight today and prices closed fractionally lower after a session of narrow price movements. Final quotations were about at the lows of the day, reflecting liquidation by holders who had become discouraged at the inability of the market to advance earlier in the season.

Failure of local wheat prices to gain was a disappointment to some traders in view of the strength at Winnipeg, where the bread cereal established new peaks since 1938, as well as the strong undertone which prevailed in cotton and securities.

At the close wheat was ¼-½¢ lower than last Saturday's finish, September \$1.48¼, December \$1.48¼-¾, oats were unchanged to ¾¢ down, September 77½, and rye was off ¼-½¢, September \$1.06-1.05½.

Traders said the advance in wheat at Winnipeg reflected export buying. As occupied countries in Europe are re-conquered by the United Nations, more Canadian wheat may be exported, traders stated. They said shipping difficulties might be encountered in exporting Argentine and Australian grain.

Grain circles said they understood the Commodity Credit Corporation had taken 3,500,000 bushels of Canadian wheat last week. The agency's stocks are believed to total about 100,000,000 bushels. Selling of wheat for feed by the CCC continues unabated, but no sales may be made to persons with more than a 30 day supply on hand.

## Austrian Field Pea Purchase Program Off

By W. M. Tate, chairman of the county AAA committee, advised county growers to plan their fall planting when he revealed last week that there will be no government purchase program for Austrian winter field peas in 1944.

By this, he explained, the price of peas will not be supported at 5 cents a pound as it has been during the last two years and growers who plant peas should plan on their being sold on the open market.

The 1944 seed purchase program probably will be limited to common and hairy vetch, Tate said. Purchase price for the two are 5 cents for common and 10 cents for hairy vetch, but as yet, next year's prices are undetermined.

## Beekeepers May Get Additional Sugar

Under a recent OPA amendment, beekeepers may obtain an additional sugar allowance—up to 15 pounds per colony—for feeding their bees. Applications are made to the local OPA rationing board and must contain certification by the county USDA war board that the additional sugar is required to prevent loss of bees.

## Squeeze on Processors Of Feeding Stuffs Eliminated by OPA

To eliminate a "squeeze" on processors of animal product feedstuffs who contracted for importation of dry rendered tankage between May 15, 1943, and July 12, 1943, the OPA has authorized these processors to establish their maximum prices under the original regulation covering the feeding-stuffs rather than under the revised regulation issued July 13.

This authorization applies only to processors who contracted between these dates and who did not have the imported material allocated to them by the war food administration.

## Dry Onion Shipments Restricted Now

Onion shippers in Oregon and in 11 other states now are required to obtain permits from the food distribution administration before making any shipments of dry onions in excess of 100 pounds except for nearby storage.

The restriction is designed to obtain equitable distribution of civilian supplies, and to obtain sufficient dry onions for dehydrating for military and lend-lease needs.

## Worthington Car Destroyed by Fire

HOPEWELL—Fire, presumably started by a short circuit in wiring and a leak in a gasoline line, totally destroyed the 1936 Chevrolet sedan of Mr. and Mrs. Howard Worthington Wednesday night.

The car caught fire near the bridge on the Dayton-Salem highway not far from the Stratton-Windsor farms where it had been parked.

The Worthingtons had accompanied Mr. and Mrs. Tom Dixon to Independence to search for a bill folder and papers which had been lost. No one was seriously burned in the fire.
