Stocks Top Good Week

Rails, Utilities, Industrials Add Fractions of Point

By BERNARD S. O'HARA

NEW YORK, Nov. 20—(AP)— The stock market today topped a generally good week with its third successive advance.

In relatively broad and active dealings for a short session, favored rails, utilities and industrials added fractions to a point or so to Friday's sharp upswing and, while a little profit taking at the last trimmed peak prices here and there, many leaders closed at or near the day's best.

The Associated Press 60-stock average was up .3 of a point at 48.6, and on the week held a net advance of .6. Transfers totalled 481,976 shares, largest for a two-hour stretch since September 18.

Among the day's gainers were Goodyear, Goodrich, Chrysler, US Steel, Western Union "A", Santa Fe, Southern Pacific, Texas Co., Sears Roebuck, J. I. Case, Douglas Aircraft, Glenn Martin, Pepsi-Cola, Philip Morris, Du Pont, Oppenheim Collins, America Cable & Radio, International Telephone, and United Corp. preferred.

Wheat Still Moving Up

Prices Ragged At Start; Trading Inactive but Steady

By WILLIAM FERRIS

CHICAGO, Nov. 20—(AP)—Wheat continued on its upward trail today, moving to new highs for as long ago as 18 years on good buying attributed to millers, distillers and feed manufacturers.

Although trading was not active, the advance was persistent throughout the session. Prices were ragged at the start and then started upward, offerings on the advance were light, although a little profit-taking immediately prior to the close brought a slight recession.

At the finish wheat was ¾-1⅜ higher, December $1.62⅜-¼.

The advance sent December wheat to a new peak since 1925, July to a high since 1928 and May to its best levels since 1929. There was also a strong demand for a bread cereal in the cash market with shipping sales out of here reported at 100,000 bushels.

In back of the upturn, as has been the case each day in the latter part of this week, was the government's flour subsidy program and the thought by some traders that wheat might advance to parity levels at which point the OPA may place ceilings over the grain.
