**SKILLED "GROUND CREWS" HELP MAKE GREAT NORTHERN SERVICE DEPENDABLE**  
Railways always have had "ground crews,"—thousands of men (and women, these days) who perform the vitally essential tasks which keep trains rolling.  
Movement of the Great Northern's Empire Builder requires co-ordinated action by yardmen, car inspectors and service men, engine handlers, train dispatchers, water and fuel servicers, clerks, telegraphers, telephone operators and signalmen—a mighty important "ground crew."  
Although not actually involved in train operation, there also are the maintenance-of-way crews who keep in shape Great Northern's tracks, signal systems and bridges.  
And, we're not forgetting the shopmen, who also are working around the clock repairing and rebuilding locomotives, cars, and other equipment.  
Skilled "ground crews" are among the many things which make Great Northern great—and a dependable transportation system.
