

**A BOWL OF PIPING HOT SOUP** is a mealtime suggestion. With a sandwich and a crisp salad it's an easy and nourishing meal for children home for lunch, or a bowl of soup or broth alone will start off an evening meal for the whole family. Something new has been added to the bowls of hot broth pictured above, liver dumplings. Mash one-half pound of liver sausage in a bowl, add 1 slightly beaten egg and blend well. Add ¼ cup cracker crumbs and mix thoroughly. Shape into 12 dumplings about 1-inch in diameter. Roll each in fine crumbs, then drop onto hot soup or broth in kettle. Simmer about 15 minutes, sprinkle with chopped parsley, and serve hot. A good beef or chicken broth, topped with liver dumplings and served with a big tossed vegetable salad and hot rolls, makes an attractive and appetizing party luncheon.

**Potatoes Now Puffed up**

Potato puffs have been a favorite way of dressing up this good old vegetable for some time. Here's an actual recipe for them.

**POTATO PUFFS**  
6 large potatoes  
1 cup hot milk  
1 tablespoon butter  
1 teaspoon salt  
¼ teaspoon pepper  
1 tablespoon minced onion  
½ cup finely diced celery  
½ cup finely diced green pepper  
5 slices bacon, diced

Wash baking potatoes and bake in a hot oven, 450 degrees, for 45 to 60 minutes, until tender. Cut a lengthwise slice off the top and scoop out contents. Mash potatoes, adding enough hot milk to make fluffy; add butter and seasonings. Add minced vegetables and part of diced cooked bacon reserving a little for topping. Fill potato shells, sprinkling a little bacon

on top. Brown in a hot oven, 400 degrees, for 15 or 20 minutes, or until brown. Serves 6.

**Cracker Crumbs In Fondue**

**Mission Bottom Growers Set Out Seed Crop Plants**

By ROSA COLE  
**MISSION BOTTOM**—William P. Collard finished planting Swiss chard and parsnip plants for seed Thursday. He had about one acre of chard, parsnips and beets here which produced about 300,000 plants.

Chard and parsnips are planted three and one-half feet each way. There are between 3800 and 4000 plants to the acre. Woodruff Seed company has the contract for the seed.

In harvesting parsnip seed the plants are pulled in the early morning while they are damp with dew and laid on canvas. When the sun is high and the dew dry they are flailed out and cleaned. Part of his plantings were here and part on the north end of Lake Labish.

Mr. and Mrs. Wendell Barnett have put in about two acres of onion seed known as "flats" on their Lake Labish ground and will raise onion bulbs to be transplanted for seed.
