Poultry Prices Will Increase

WASHINGTON, April 12 — (P) — The office of price administration expects to announce in the next few days an average increase of about two cents a pound in ceiling prices on all live and dressed poultry sold in the rest of this month and during May and June, a spokesman said tonight.

Effective at producer through retail levels, the proposed hikes already have been approved by Stabilization Director Fred M. Vinson. Details of the new schedule have not been completed by OPA, but present plans call for a boost of one and eight-tenths cents a pound in April, two and two-tenths cents in May and one cent in June.

The higher ceilings result from an appeal by producers that an adjustment is necessary to meet increased costs of the three-month peak production period. Beginning July 1, ceilings now in effect will be restored, the spokesman said.
