O'DAY'S TO-DO TODAY

By June O'Day

Ounces of Prevention

Summer isn't all beach parties and begonias as most every woman knows. Not much can be done about the increase in the weekly wash, but here's a tip on a summer problem. To keep sprinkled clothes from mildewing in hot weather, place them in the refrigerator 'til you're ready to iron them.

While your costume jewelry is still fresh from its tissue and ribbon, apply a coat of clear nail polish over it to prevent tarnishing. If it has already lost its luster, try cleaning it with metal polish and then apply that nail polish, yes, it works.

Air bubbles in nail polish are an annoyance any time of year; so, don't shake that bottle of polish just before using. When shaken, the polish becomes full of air bubbles which become unsightly blisters on your nails.

If you prefer light, sunny, summery slip covers but dread the laundering, here's a summer tip: to get a better fit on slippers that have been washed, put them on the furniture while they're still slightly damp. The material will give more readily and they'll fit like new.

Summer Scents

To lighten your favorite perfume for summer, or just to make it go further, mix it with its sister-toilet water and enjoy it the year round.

If the sweep of your lovely lashes is a secret between you and your curlier . . . and your curlier needs a retreat, remember the old rubber and pour candlewax into the lower groove. Not as good as new, but it works!
