

### US Invasion Shipments Hit Amazing Total

WASHINGTON, June 29 (AP)—Advance shipments for the invasion piled up more than 16,000,000 tons of supplies in Britain in a year. Twice the tonnage which Gen. Pershing received during World War No. 1, Lt. Gen. Brehon Somervell reported today.

The commanding general of the army service forces said in an interview that pre-shipment of supplies for the invasion stockpiles began more than 12 months ago, while as long ago as last August 11, the army began planning in exact detail the restoration of the port of Cherbourg.

Cherbourg was a "keyed project," said Somervell, and a hint of the staggering planning job that preceded the landings in Normandy was continued in his added comment that there were more than 300 keyed projects of various size and importance.

Complete restoration of the port of Cherbourg, based on the experience at Naples, may take several weeks, Somervell stated, but it will be in use long before that—probably is already in use. And when the work is complete, the port's capacity will have been greatly expanded.

The beachhead supply was on a scale which no one would have dreamed was possible, he said.

### Finland Party To Withdraw Cabinet Men

STOCKHOLM, June 29 (AP)—Finland's dominant social democratic party has ordered its five cabinet ministers, including Finance Minister Vaino Tanner, withdrawn from the Risto-Linkomies government which plunged Finland into full collaboration with Germany and opened the doors of southern Finland to Nazi troops.

The formal withdrawal is scheduled for a meeting of parliament today but after spending five tense days in Helsinki it is my impression the action may yet be withheld as a result of the widely expressed fear of many Finns that Tanner's resignation might precipitate a collapse of the morale of Finnish troops at the front.

The progressive party and the Swedish peoples' party also expressed no confidence in the government in party caucuses. One progressive member may withdraw from the cabinet.

Besides Tanner, who symbolizes Finland's resistance to Russia, other social democratic cabinet members slated to leave the government are Minister of Social Affairs A. Alltonen; Minister of Communications Valio Salovaara; Minister of Trade Dr. Takki and Jalo Aura, minister of food.

### Alfalfa Hay Gets Ceiling

WASHINGTON, June 29 (AP)—The office of price administration today fixed nationwide price ceilings for alfalfa hay, previously under price control only in eight western states and part of Texas.

The new regulation, effective July 3, is intended to curb mounting prices in areas not under control and prevent resultant price increases for livestock and livestock products, OPA said.

The national ceilings are an average of \$1.25 a ton higher than maximums in effect in the west but are "much lower" than prices being charged in other states, the agency stated, adding that in some areas the reductions will amount to as much as \$5 to \$7 at retail.

The new prices average a return to the grower equal to parity of \$21.50 a ton, OPA said. They range from a low of \$19 a ton to a high of \$26.50.

### Civilians Will Feel Pinch Of Shortages

WASHINGTON, June 29 (AP)—The civilian is "just beginning to feel the pinch" of wartime shortages and, despite government efforts to fill in the worst gaps in civilian supply, can expect no large-scale relief until the war ends, Director William Y. Elliott of the office of civilian requirements, stated today.

"Up to this point this country has suffered no serious deprivation," the war production board official said in an interview. "Now the war is coming home to civilians."

"The average American must expect a very thin time of it unless there is an early end to hostilities."

Large supplies of consumer goods built up in the period of intensive manufacture before war work hit its stride have now been drained from factory, wholesale and retail stocks, Elliott explained.

A new shortage has developed in steel—the result of invasion demands for landing craft, heavy artillery shells and more tanks—which will affect all consumers' goods made of that metal, Elliott reported, adding that the munitions cutbacks that were expected to cut military demands have not arrived.

### Cherry Prices Announced

SAN FRANCISCO, June 29 (AP)—The regional office of price administration (OPA) announced today processor ceiling prices on 1944 Pacific northwest canned and frozen sweet cherries should allow an average price to growers of \$225 a ton for black varieties and \$215 a ton for white.

Growers of "brining" cherries, OPA said, should get \$205 a ton for fruit used in processing cocktail, maraschino and glace cherries.

The following schedule applies in Oregon and Washington: Black—grade 1, \$237 ton; grade 2, \$150. White—grade 1, \$217; grade 2, \$157.
