Bean Pickers Are Mobilized For Harvests

The OSC extension service, through the state emergency farm labor office, was mobilizing its forces throughout the Willamette valley today for the harvesting of a record breaking acreage in snap beans.

The major portion of this crop, which last year was valued at about \$3,000,000, will have to be harvested by youth and women again this season. A total of 4700 acres of snap beans have been planted for processing this year, it is estimated, or 400 more acres than were harvested in 1943. In addition, some acreage has been planted for the fresh market.

The bean harvest will begin in some areas about July 25, but the peak demand for workers will not come until about the middle of August. County farm labor assistants will recruit these pickers. Two grade school children under proper supervision can pick as many beans as an adult man, results of a bean harvest labor efficiency study made last year by the OSC farm management department indicate. The study also showed that boys and girls in platoons under adult leadership picked about 10 per cent more beans than youngsters not in platoons. Those who had previous experience picked from 10 to 20 per cent more than inexperienced pickers.

The average amount of beans picked per day by all ages was approximately 150 pounds. Adults averaged about 200 pounds daily, grade school children from 11 to 14 years about 100 pounds, and high school children from 14 to 17 years around 130 pounds. Some Mexican and migratory labor will be available for the bean harvest but local help is expected to carry most of the load, the state farm labor office reports.

Children Pickers Learn Best From Leaders

Children bean pickers working in platoons average about 10 per cent more pounds a day than non-platoon workers, a bean picking study made last year by the OSC farm management department showed. Platoon leaders, like the woman at right not only show the youngsters how beans should be picked but are able to direct and supervise their work in the fields.

Filbert Moth Flight Now at Season Peak

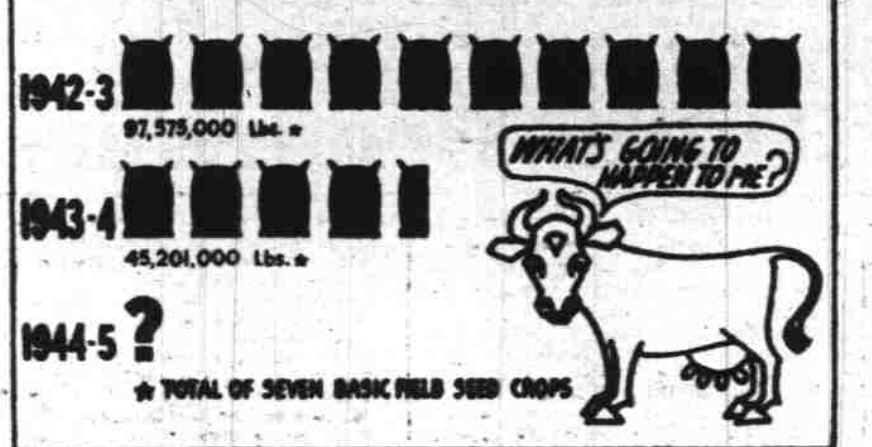

By LILLIE L. MADSEN That the peak of the filbert moth flight has been reached and that filberts should be sprayed by July 22 is the information Willamette valley county agents are giving out this week. Dr. E. G. Thompson of Oregon experiment station is in charge of watching for the peak.

The recommended spray is three pounds of lead arsenate per 100 gallons of water plus a spreader. The recommended dust is 40 per cent arsenate dust at the rate of 40 pounds per acre. The filbert larvae feeds on the under surface of the leaves, therefore spraying and dusting should be concentrated on this area for best results. Those who are bothered with filbert blight can apply the arsenate with 6-2-100 (6 pounds of copper sulphate, 2 pounds of quick lime or 3 pounds of hydrated lime, per 100 gallons of water) bordeaux mixture.

From indications of early dusting experiments on mint, to control the mint flea beetle, crystallite seems to be doing the job, W. G. Nibler reports. A 40 per cent crystallite dust was applied to the John Henry mint planting near Brooks on July 13. By Saturday about 95 per cent of the flea beetles were dead and probably will not be able to reestablish themselves in sufficient numbers to do much damage this season. The crystallite dust which is a 40 per cent mixture was applied at the rate of 35 pounds per acre.

Dust, says Nibler, when the air is very still, or use some type of a hooded duster to hold the dust on the ground.

FIELD SEED CARRY OVER

Due to unusually heavy drain on reserve supplies during the past two years, farmers are threatened with a serious shortage of legume and grass seeds—a vital link in production of food now and in the future. Uncertainty of new seed production and needs for fall seeding call for a sufficient carry over to meet requirements and maintain a reserve supply. In addition to providing feed for increased numbers of livestock, legumes and grasses have a direct bearing upon future yields of other crops. Land under wartime strain of peak production must have legumes and grasses to maintain and restore fertility, and must have cover to combat erosion. Desired hay and pasture acreage cannot be maintained, however, unless this year's seed harvest is larger than in either of the past two years. Since seed production varies greatly because of weather, and the acreage available for seed harvest is smaller than in either of the past two years, it is urgent that more than the usual number of acres be harvested for seed.

Salem Market Quotations

Co-op Market News

1288 STATE ST.

Some of the finest red raspberries grown in the Willamette valley will be available again this Friday and Saturday. There will also be some youngberries, boysenberries, blackcaps and probably wild blackberries. In booths 2 and 3 you will find some dressed poultry on Friday and directions for ordering fryers, hens, etc., to be brought to the Market for you on Saturday. For hand made novelties go to booths 7 and 8—Rug weaving equipment in the special booth. In booth 10 you will find flowers of many kinds. Friday and Saturday you will find home grown early peaches and apples, new potatoes, and a full line of vegetables, also filberts, walnuts and walnut meats. If there is anything you would like to buy through the Co-op Market that you do not find when you shop there tell the Superintendent about it. Such supplies can probably be made available just when you want them. It's time now to make plans to use the community cannery for string beans. Arrange to have your cannery supplies come direct from the ranch at the time that you can get service at the cannery. For information about Market supplies telephone 3797 during market hours. At other time phone 8280 or 7480. Look for Co-op Market news again next Friday.—Pd. Adv.

Early Pole Bean Harvest Underway

JEFFERSON — C. R. Gee planned to start picking early pole beans Wednesday morning, in his five acre patch, but the rain Tuesday night and Wednesday morning made it too disagreeable for picking. He has ten more acres of the late variety of blue lake beans, which will be ready to pick as soon as the early ones are finished. Mr. Gee brings the pickers back and forth from Jefferson in his truck.

Picking Boysenberries Started at Wheatland

WHEATLAND — Picking started at the almost four acre boysenberry field at the Mrs. Walter Kirkwood farm Thursday. A full crew of local people are doing the work. Marion Gilchrist is the manager. Ed Loop of Hopewell is hauling them to the Reid-Murdoch cannery at Salem.

SINGER—Bernie Rosenburg, winner of a "swing shift feller" contest, who works at the factory of the Ford Instrument company, Long Island City, N. Y.

Permanent position. Hogg Bros., 260 State.

Grains Go Up, Then Slump

CHICAGO, July 20 —(AP)—Wheat futures started higher today and maintained fractional gains until late in the session when the advances encouraged hedge selling and the market eased back to near yesterday's close. Rye was independently weak the end of trading and oats were firm. Reports of additional black rust damage to the spring wheat crop caused a flurry of short covering at the opening but the demand was not sustained. At the close wheat was 1/4 higher to 1/2 lower than yesterday's finish, July 1.57 1/2. Oats were 1/4 to 1/2 higher, July 78 1/4. Rye was 1/4 to 1 cent lower, July 109 1/4. Barley was unchanged to 1/2 lower, July 126 1/4.

CAN'T KEEP GRANDMA IN HER CHAIR

She's as lively as a youngster— Now her backache is better. Many sufferers relieve nagging backaches quickly once they discover that the real cause of their trouble may be tired kidneys. The kidneys are Nature's waste filter. They filter the excess acids and waste out of the blood. They help most people pass about 3 quarts a day. When disorder of kidney function permits poisonous matter to remain in your blood, it may cause nagging backache, rheumatic pains, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness. Frequent or scanty passages with stinging and burning sometimes shows there is something wrong with your kidneys or bladder. Don't wait! Ask your druggist for Doan's Pills, used successfully by millions for over 40 years. They give happy relief and will help clear the kidneys, take the poisons out of your system from your blood. Get Doan's Pills.

Stock Market Dips Slightly

NEW YORK, July 20 —(AP)—Ralls tried to lead the stock market on another recovery trip today but they failed to hold and relatively urgent selling toward the close threw both carriers and industrials for losses of fractions to a point or more generally. The Associated Press 60-stock average was off 4 of a point at 55.4. It was another broad market, 929 issues appearing. Of these 492 were down, 234 up and 203 unchanged. Transfers totalled 1,342,910 shares compared with 1,138,700 the day before.

Stocks and Bonds
