## One of Quads Dies 26 Hours After Birth

Hospital attendants said the other three babes were "doing fine."

Dr. George Karelis, one of the attending physicians, said the baby that died was the first born of the four.

The 23-year-old mother, Mrs. Charles E. Lee, had not been told of her baby's death, Dr. Karelis said. Earlier today, Mrs. Lee, also the mother of a three-year-old daughter, was reported making good progress herself, but was a little confused by the multiple birth. For one thing, she hadn't been able to pick out names for her sons.

The husband, a 25-year-old, 190-pound infantryman at Camp Blanding, Fla., trudged off on a 17-mile training hike an hour after he was notified last night but later today was given an emergency furlough so he could visit his family.

Lee, a farmer before induction, commented: "I guess I've got a job cut out for me after the war."

## Hawaii Plane Fares to Be Much Lower

**SAN FRANCISCO, Aug. 23—(AP)**—Hot competition among half dozen airplane transport companies for the route between the Pacific coast and Hawaii put the potential postwar fare below \$100 today.

Harold M. Bixby, vice president of Pan American World Airways, told newsmen today his firm would offer a \$96 one-way fare from Los Angeles and San Francisco to Honolulu. Round trip would cost \$172.80.

Rates proposed by five other firms seeking a permit for the mainland-to-Hawaii service range from \$125 to \$201 one way. Present fare is \$278 one way and \$500 round trip.

Bixby said use of huge land planes will make possible the fares Pan American proposes. The planes will have a speed of 300 miles an hour, cutting time to the islands to 8 hours from the 16½ now required. Each plane will carry 128 passengers.

Engineering has been completed on the new planes, Bixby said, and application for authority to build them sought from the war production board.

**Wheat** Almost incredible is the wealth of the broad, rolling agricultural acres of the West. If Oregon and the states of the Pacific Northwest had no other resource than wheat they would still constitute a rich empire. Acre for acre no region in all the world produces harvests of such lavish yield. More than fifty varieties of spring and winter wheats thrive in the fertile soils of this territory, providing mills with every degree of hardness and softness for blending into all types of flour. Unsurpassed is the wealth of the West where nature has provided every resource for the well-being of man.
