Workers on Different Jobs Use Different Tools

But the one tool used on all jobs and the most vital to production is EYE-SIGHT!

Several thousand spies and saboteurs in the U. S. have been rounded up by the F. B. I. But throughout the war industries there are still several million saboteurs. They are beyond the reach of the F. B. I. Working silently and insidiously, they slow down production, bring about mistakes that result in faulty material and defective equipment. They cause accidents—hundreds every day. They are contributing help to the enemy!

Guillotine May Come Into Use

PARIS, Dec. 13 (AP)—The famous Paris guillotine may be uncrated for the execution of Charles Bony, Henri Lafont and seven other French members of the Gestapo who were sentenced to death today for working for the Germans during the Nazi occupation.

Previously idle because of transportation difficulties while executions were carried out by firing squads, the guillotine may be used on the nine defendants who were accused of a series of murders, kidnappings, tortures, extortions and robberies in the guise of political activity. Some of them were accused of working for the Nazis in German uniforms.
