## **Active Stock Market Gains** .5 of Point

NEW YORK, Jan. 3-(A)-On another broad buying movement the stock market today carried its late December upsurge into the new year and registered for leaders gains ranging from fractions to around 3 points.

The steels were special favorites, heavy demand asserting itself here at the start and spreading to other pivotal industrial groups and to the rails. Closing prices were only slightly under the day's highs.

Volume of 2,163,510 shares were the largest since July 5 and compared with 1,341,420 yesterday. There were only about seven better than two-million share days last year.

The Associated Press 60 stock composite rose .5 of a point to 58.9, highest since September 17, 1937. Each of the components, industrials, utilities and rails, established a new peak.

Some of the top gainers were Bethlehem Steel, up 21/2, US Steel 1%, Allied Chemical 21/2, Eastman Kodak 3, American Can 2%, US Rubber 114, Sears Roebuck 114, International Telephone 14, and Johns-Manville 11/2.

Season Highs CHICAGO, Jan. 3-(AP)-All de liveries of wheat, corn and barley and the deferred rye contracts established new season highs on the Chicago board of trade today but profit cashing appeared on all the bulges and some of the gains were lost. Oats were weak throughout the session.

Millers were in the wheat market, lifting hedges after heavy flour sales, shorts covered and prices moved up sharply with the new crop months, July and September, showing greatest strength. Some buying was attributed to belief that government plans to draft farm youths would reduce next season's wheat acreage.

Corn was nearly a cent higher during the early trade but the market encountered liberal profit

At the finish wheat was 1/2 to 1% higher than yesterday's close, May \$1.66 1/2. Corn was unchanged to 1/2 lower, May \$1.131/8. Oats were off % to %, May 68%-1/2. Rye was 1/8 lower to 3/8 higher, May \$1.17%-14. Barley was unchanged, May \$1.17.

## Good Roughage Necessary for Milk Production

Thee size of the dairy herd should be adjusted to conform with the program for the production of roughage for the next

There is a tendency to overstock some farms, which means that additional feed must be purchased or cows will not receive enough to enable them to produce up to their inherited ability. If dwarf control area in Marion cows are to produce efficiently it County established under Control cows are to produce efficiently it is desirable that they have all the good quality roughage they can use at all times.

If there is not enough feed available to feed the cows liberally through the winter season it would be better to cull some of the low-producing cows and give the feed to the better ones that can make more efficient use of it. Such practice will not only increase the milk production per cow, but it also will increase the total milk and butterfat produc-tion for the entire herd.

## Your Federal Income Tax

(Continued from page 4)

come to the Government after the close of the year on forms. or blanks, prescribed by regulations, as a basis for closing their tax account for the year.

For individuals, either of two forms of return may be usedthe regular return on Form 1040 or a simpler Form W-2 (Rev.), printed on the withholding tax receipt which the employers are required to furnish to the employees at the close of each year.

The Forms 1040 are obtainable from any collector of internal revenue and, generally, from any bank. Other forms are designated for corporations, for partnerships, for trusts and fiduciaries, and for nonresident aliens. Farmers who keep no books of account and use the cash method of reporting income must attach a special schedule (Form 1040F) to their returns.

Withholding Receipt Return Form W-2 (Rev.).-A striking feature of the present law is a provision under which most wage earners may choose simply to answer a few questions about income and exemptions on a Withholding Receipt, Form W-2 (Rev.), attach to it all other Withholding Receipts for the year, file it as an income tax return, and have the collector figure the tax for them. Three conditions must be met before the wage earner may take advantage of this privilege - (a) his gross income for the year must be less than \$5,000; (b) it must be derived entirely from wages, dividends, or interest; and (c) the part of his income other than wages that were subject to withholding must not be more than \$100. A husband and wife may com-

bine their income on a Withholding Receipt if their combined income is within the limits stated above, dividing their income on line 4 in accordance with State laws. If they do so, the collector will figure the tax jointly and separately, and will use the smaller amount as their tax liability. If their combined income exceeds these limits but each. individually, is eligible to use the withholding receipt type of return, each may do so and the tax will be computed by the collector as separate returns.

This Withholding Receipt return has no entries for deduction of expenses, for the collector who computes the tax will use a tax table which is a shortcut method of finding income tax. (Since a traveling salesman or other persons who wishes to deduct traveling expenses in Form W-2 (Rev.), he must file the regular return on Form

When the collector has figured the amount of unpaid additional tax due, if any, he will send a bill to the taxpayer. This bill must be paid within 30 days after its mailing. If the amount of tax withheld exceeds the tax due, a refund will be made.

An X-ray inspection device on ome assembly lines sounds visible and audible alarms and daubs red paint on defective material passing under it. The device also makes a record of all rejections.

fastened there, frozen to the ground. They touched the rifle barrels and their fingers stuck Through it all, the fluid, shift-

ing battle brought danger everywhere. Miles behind the combat line, tommyguns were followed by grim-faced figures, who often materialized out of the fog or snow, and pointed unwaveringly at you until you gave the pass-word or otherwise identified yourself.

Driving along a presumably safe road through the lonely forest you'd meet haggard looking soldiers and ask them if it was okay to go on ahead youand then be paralyzed with shock when they asked you if it was okay behind you. They'd been on patrol in questionable territory.

bled excited shouts. Once in a while, a stray bullet would snap Food Stock You never found out who fired Filings Due by and ricochet against a tree.

You accepted the mystery. Living was a dangerous thing.

## **Duota Small for Farm** Tractors for Year

Oregon's first quarter 1945 quota of crawled tractors for agricultural use does not provide any grounds for optimism. This statement was made by N. C. Donaldson, executive assistant to the state AAA committee. The new state quota of 48 machines compares with the authorized releases of 80 units in the fourth quarter of 1944.

take 85 per cent of the output of day in a report to the controller tracklaying tractors, and indications are that heavy military de-mand will be the rule during the of the last bank call in June. coming year.

by. Mysterious explosions gar- out by county committees.

Industrial and institutional users of processed foods, meats and fats and sugar are required to file their inventories as of the close of business on December 31 with local OPA boards not later than January 7, 1945, Willard Case, district OPA food rationing representative, announced Wednes day. The January-February allotments cannot be issued until this report has been filed, he said.
