Your Federal Income Tax

(Continued from page 4)

The normal-tax exemption used in computing normal tax is explained in article No. 6 in this series. What are "surtax exemptions?"

In computing the surtax to be entered on a long-form for 1944, you may treat as not subject to this tax, and you may therefore subtract from your net income as a "surtax exemption" on line 4, page 4 of Form 1040, in ascertaining the income that is subject to surtax, a flat or fixed amount of \$500 for each name properly listed in item 1, page 1 of the return, that is—(a) \$500 for yourself; (b) \$500 for your wife or husband provided that you file a combined or joint return, or that she or he has no gross income for the calendar year in which your taxable year begins and is not dependent of another taxpayer; and (c) \$500 for each dependent who has less than \$500 gross income for the calendar year in which your taxable year begins and who, if married, does not file a joint return with wife or husband. The surtax exemption for dependents is further explained in article No. 8 of this series.

If you file your Withholding Receipt as a return and let the collector compute your tax for you by using the tax table, or if you use the tax table in the short-form return on Form 1040, you automatically get the full benefit of all the surtax exemptions to which you are entitled, without having to make the actual subtraction, because an allowance for the credits which you claim (on the back of the Withholding Receipt or in item 1 on page 1 of Form 1040) has been worked into the table itself.

If a husband has gross income and his wife has none (or less than \$500) they are entitled to file a combined or joint return in which they receive the benefit of a total surtax exemption of \$1,000, in which case neither of them can be claimed as a dependent by any other person even though, for example, the wife's father may have furnished the entire support of his daughter.

Grain Market Rises Sharply In Final Hour

CHICAGO, Jan. 8.—(AP)—Grain markets recovered from mid-session uneasiness in a brisk final hour of trading today and prices rose sharply. Rye led the rally, establishing new seasonal highs for all three contracts and closing at the day's best figures. There was little in the news to account for the bullish trade shortly before the close and market sources attributed the sharp advances to general buying, much of it for outside speculators. Late dealings in rye overshadowed the trade in other pits. After opening 1/4 of a cent higher the market dipped at mid-session under the pressure of selling by commission houses that frequently act for eastern interests. During the decline commission houses absorbed large rye offerings and when local shorts tried to cover prices did a quick about face. The Chicago board of trade reported that last week the visible domestic supply of rye had decreased 407,000 bushels to a total of 11,768,000 bushels. During Saturday's session the open interest in May rye increased 1,360,000 bushels.

Rye futures were strong at both Winnipeg and Minneapolis and Winnipeg advances said that commission houses with Chicago and New York connections had entered that market on the buying side only to find a scarcity of offerings. At the finish wheat was 3/4 to 1 cent higher than Saturday's close, May \$1.66 1/4. Corn was up 1/4 to 1 1/4, May \$1.13 1/4. Oats were 1 1/4 to 1 1/2 higher, May 70. Rye was up 1 to 2 1/4, May \$1.18 1/4-1.19. Barley was 1 to 1 1/4 higher, May \$1.18 1/4.

Wheat turned lower shortly after the opening when a broker with milling connections offered moderate quantities. The late rally was due largely to buying by local traders and apparently was prompted by the strength of rye.

Oregon Wheat Market Keeps Steady Tone

PORTLAND, Jan. 8.—(AP)—The cash wheat market here failed last week to follow advances of the midwest wheat futures, the war food administration said today, and even fell below the previous week's activity. The local market continued a general steady tone with prices on most classes unchanged from a week ago. Bids on soft white were down one half cent a bushel. Mills evidenced only moderate interest for ordinary types and quality, but bid eagerly for wheat with 11 per cent and higher protein. Recent sales to government agencies filled most requirements of ordinary types, mills explained. Feeding qualities were in steady demand from mixed feed manufacturers, while offerings of wheat at country points were somewhat freer, trade reports indicated. Supply of higher protein qualities were only moderate.

Portland had 148 cars of the 395 at Puget Sound and Columbia river terminals, where receipts were lighter for the week. California buyers were moderately in the market for protein types of hard white and hard red winters.

Wriglesworth Turkeys Sold to Government

GATES—Ernest Wriglesworth has disposed of the entire flock of turkeys raised this season. Of 327 birds sold last week only three were placed in class B. Wednesday of this week the remainder of his stock, 405 birds were sold. The entire flock of turkeys were sold to the government and taken to the Willamette Packing plant.
