## New Creamery Has Opening

DALLAS—Saturday morning and afternoon Mr. and Mrs. G. Brandl held open house at their new creamery.

The structure which is nearly completed, was built by Ervin Batterman, general contractor, according to specifications suggested by the state department of agriculture, that adheres to strict regulations of sanitation and health.

From the weighing vat in the receiving room, the raw milk runs through stainless steel pipes to the pasteurizer, cooler and boiler. The 1200-pound capacity churn will accommodate the increased business expected following the close of the war. Some months the butter production has reached 10,000 pounds. The refrigeration system and cold box have also been resigned to care for the increased ice cream business expected and which is limited to war quotas at present.

The salesroom at the front of the building, equipped with booths and counters, a and limited to the sale of ice cream and milkshakes, will in postwar era offer a complete fountain service. The furnace room, where steam is produced for heating as well as general use and a large store room complete the building.
