With Victory in Europe comes a

From those who have served their country on far-off fields of combat, we have now received the first priceless gift of Victory . . . and with this Victory a challenge!

For from these men who have sacrificed so much—and from the other millions who have backed their efforts by carrying on so effectively their appointed tasks at homecomes the demand that total victory and final peace, through triumph over Japan, shall bring them the opportunities for which they fought and worked-the opportunities to live, progress and prosper.

Here is a challenge to us all—a challenge to see to it that the road to realization of these natural human ambitions runs smooth and straight.

We of General Motors believe that what is good for our country and our countrymen is good for General Motors; and that there are time-tried and unfailing guides upon which Americans can depend.

They can be described in terms of certain simple "articles of faith":

Faith in America and in America's future -a future of expanding, useful productivity and ever higher standards of living.

Faith in the rightness and benefits of individual freedom and individual enterprise.

Faith in the principle that there can be no rights without responsibilities-no privileges to enjoy without duties to perform.

Faith in work, as the forerunner of reward -in incentive, as the kindling spark of productive energy-in opportunity to serve a need, as the first requirement to provide a job.

Faith in the American way of doing things, by which each person, each organization, each industry, each business must take its place-and be granted that placeaccording to ability and capacity-in one great, coordinated, inter-geared system of living, working and contributing to the national welfare.

Faith in America's progressive instinct and in the things which serve it-science, research, engineering, technical knowledge and skill.

Faith in the rights of great and small alike

-and of the importance of each in a free, peaceful and productive nation.

Before us lies one immediate, definite task -more important than all others-to defeat Japan.

With the first big obstacle to final victory removed—it is not too soon, we think, to face the challenge of that peace which our fighting men will have won so dearly.

We believe the principles which we have stated are those with which the challenge must be met.

We believe that if we follow these principles-with stout hearts and willing hands -America's future will inevitably bring better things for more people.
