

**Fled Germans, Helped Develop Bomb**

Two leading European scientists who fled Nazi persecution are disclosed to have made prime contributions to the development of the atomic bomb. At left is Dr. Lisa Meitner, German born Jewish woman physicist who was driven from Germany by Hitler's racial laws and has been at the Stockholm Academy of Science since 1938. She contributed vital mathematical calculations. At right is Dr. Niels Bohr, Danish scientist who escaped to London after refusing to work for the Germans. (AP Wirephotos)

**Libby Cannery Workers Plan New Walkout**

PORTLAND, Aug. 9—(P)—Workers at the Libby, McNeill & Libby cannery threatened today to renew their month-long strike, winning, 130 to 110, a strike vote held under auspices of the NLRB.

CIO-affiliated employees at the plant charged the company discriminated against strikers who returned to work, although a war labor board directive had ordered no discrimination. The union said 25 women with seven to 15 years' seniority were told by company officials they could return only by working as new employees on the night shift.

CIO officials said the strike, which ended yesterday, may be renewed at once unless discrimination is stopped.

**New State Industrial Hygiene Chemist Is Salem Schools' Grad**

Dr. Robin E. Moser, whose appointment as state industrial hygiene chemist was announced this week by Dr. Harold M. Erickson, state health officer, is a graduate of Salem public schools.

Moser took his master's degree at Oregon State college and his doctor's degree in chemistry at University of Washington. Prior

**Truman Calls For Speedy Ban Removals**

WASHINGTON, Aug. 9—(P)—President Truman today called for removal of wartime production controls as soon as possible to speed development of a healthy national peacetime economy.

He made it clear at the same time, however, that the time has not yet come when American business can be freed of all restrictions.

In a letter to Chairman J. M. Krug of the war production board, Mr. Truman outlined a five-point program for orderly reconversion of industry from munitions to consumer goods manufacture. This was its theme:

"Every opportunity must be given to private business to exercise its ingenuity and forcefulness in speeding resumption of civilian production, subject to war needs." But he said that in order to achieve unprecedented civilian production it is necessary that WPB "continue for the present some of the effective measures it adopted to achieve unprecedented war production."

This point had a direct bearing on a current sharp dispute between WPB and the office of price administration as to whether controls on materials may be lifted when the latter agency feels they must be retained to help control the cost of living.

While the president said clearly that controls should be lifted "as soon as they are no longer needed," he added that there must be continued allocation of scarce materials when this is necessary to provide low-priced products "essential to the continued success of the stabilization program."

**Turkey Record Set**

PORTLAND, Aug. 9—(P)—Alvin B. Friedrichs, Molalla, set a record of early turkey delivery when he brought a lot of mature birds to a slaughter house today. Hatched February 14, the turkeys averaged an unusually heavy 15 pounds.

to assuming his new post in Oregon, he was employed as an industrial chemist in Louisville, Ky.
