## VERDICT OF THE AGES

F.B.I. reports show that, in 1944, 12.6 per cent of fingerprint records of reported arrests of youth under 21 were connected with alcoholic beverages and of those under 25, 17.7 per cent were connected with alcoholic beverages. From Research Letter of Anti-Saloon League.

"Tavern babies and helpless children neglected by liquor-guzzling mothers who prefer the doubtful pleasures of a round of night spots to their duties of parenthood are becoming one of Chicago's greatest problems," the Chicago American announced.

At least 50,000 deaths in the United States every year may be attributed to alcohol. At least 50,000 more people fail to die, but become chronic alcoholics.

Veneral diseases are largely contracted in connection with drinking and drinking places, as revealed at a hearing before the Subcommittee of the Senate Committee on Education and Labor. We have in our office a letter from the head of the Eeomomy Institute in Texas in which he says that 60 per cent of all syphilitics whom he ever examined or talked to declared that they contracted this loathsome disease while under the influence of alcohol.
