S. C. Mitchell

made in hearing and now welcomed by thousands. It is a new hearing aid that does not require separate battery pack, battery wire, battery case or garment to bulge or weigh you down. So small it fits the palm of the hand. About one half the weight and bulk of most hearing aids. The tone is natural, noiseless, clear and powerful. Developed by the Beltone Laboratories of Chicago and backed by many years of electronic experience, this new device is receiving nation-wide enthusiasm among the hard of hearing. In Oregon and southern Washington it is distributed by James Taft and associates, who have been serving the deafened
