

### Eisenhower Bids Farewell To ETO Corps

WASHINGTON, Nov. 29 (AP)—Gen. Dwight D. Eisenhower, who led the allies to victory in Europe, sent this farewell message today to American troops who served with him:

"To each of you—good-by, good luck, and my undying thanks."

The lanky Kansan, known as "Ike" to GIs who followed him in North Africa, through France and the Low Countries to Germany, had intended to return to Europe for a last visit before assuming his duties as army chief of staff.

Circumstances, however, have prevented this, he said, adding that he would always regret that he could not give "a personal good-by to as many thousands of you as I could meet."

Eisenhower is in a hospital at White Sulphur Springs, W. Va., recuperating from a severe cold. The message sent to Gen. Joseph T. McNarney, who succeeds Eisenhower as American commander in Europe, was addressed "to every member of the United States forces in Europe."

But, said General Eisenhower, "I mean to include every American that has served with me in the Mediterranean and in the European theatre." He told them there is yet much to do before the peace which they helped to win "can be firmly consolidated."

"In memory of those gallant comrades who can never return, and in continued loyalty to the

### Co-Op to Construct Mill at Swiss Home

KANSAS CITY, Nov. 29 (AP)—Purchase of 46 additional oil wells in Kansas, and the expenditure of a million dollars to improve the co-operative refinery at Coffeyville, Kas., were announced here tonight by Howard A. Cowden, president of the Consumers Co-operative association, in an address to the association's 17th annual meeting.

It was also announced that the Co-op has just completed construction of a new lumber mill at Swishome, Ore., at a cost of more than half a million dollars.

### GIs to Leave From Portland

PORTLAND, Nov. 29 (AP)—During the first week in December four ships will leave here carrying occupation troops to Japan and Korea, Portland port of embarkation officials said today.

The Marine Lynx will sail Saturday for Yokohama with 172 army officers, 2024 enlisted men and two foreign correspondents; the Marine Marlin will leave Dec. 4 for Yokohama with 1747 enlisted men and 490 officers; on Dec. 6, the Alcoa Polaris will leave for Yokohama carrying 81 officers, and the Marine Falcon will sail Dec. 7 with 149 officers bound for Jensen, Korea.

principles of free government for which United Nations waged this war, each of us must give his unremitting best until the job has been fully completed," he said.

### Chemist Would 'Dump Atomic Bomb in River'

WASHINGTON, Nov. 29 (AP)—Harold C. Urey, famous chemist, recommended today that the atomic bomb be outlawed throughout the world and that all material from which it could be made be "dumped in the river" if that is what it takes to prevent military use.

The alternative, he said, is "dire disaster."

For an hour and a half the graying Nobel prize winner from the University of Chicago chided members of the senate atomic energy committee with a calm, soft-spoken appraisal of what an atomic war would mean.

Then he told them:

"Atomic bombs must not be made in any country and they must not be stored any place in the world if we are to have any feeling of security in this or any other country on this all too small planet."

"We are making bombs and storing them and are thus a threat to other countries and are guilty of beginning the atomic armament race. If continued it will lead to dire disaster."

This was his remedy:

"I believe that we should attempt to establish a control over atomic energy under the United Nations organization which would be so effective that no person or group of persons in any nation could manufacture atomic bombs

without detection and without being brought to trial and punishment.

"This means a sacrifice of some of the national sovereignty of this and other countries . . . Of course the control must cover all countries of the world."

**WOMAN SCALDED TO DEATH**

PORTLAND, Nov. 29 (AP)—Mrs. Roy C. Wilson, 49, apparently died from burns received from scalding water in the bathtub, police said today. Officers said she probably struck her head against a faucet, knocking herself unconscious and turning on the hot water.

### Grappers Fail To Locate Bus In Chelan Lake

CHELAN, Wash., Nov. 29 (AP)—Searchers grappling for the 25 mile creek school bus which plunged into Lake Chelan Monday carrying the driver and 15 children to their deaths, failed to locate the sunken vehicle today after two sweeps of the lake bottom.

The searching crews, operating from three motor launches and

a barge, said they had not determined the depth of the water, which has been estimated at about 500 feet where the bus skidded into the lake from the Cliffside road nine miles north of Chelan.

They said they used a half a mile of cable in the operation, weighting it with 500-pound weights known as "headache balls." On one sweep a waterlogged tree was brought to the surface.

Snow was gone from the ground today but the air was sharp and a wind was springing up tonight. The divers standing by to descend if the bus is found said a strong and continuing wind would force

### Housing Authority Avers Outlook Poor

PORTLAND, Nov. 29 (AP)—Only 600,000 to 700,000 of the three million homes needed next year will be built, Jesse Epstein, Seattle, federal public housing authority regional director, said today.

He told the Portland housing and planning association that a million returning servicemen need homes for their brides; another million veterans will marry next year and start house hunting, and a final million civilian families need homes.

Colds and sinus infections—Relief obtained in most cases after first treatment. No Shots, Pain or Probing. Latest non-medical method.
