This war-born Motor Oil

FIGHTS OXIDATION

New ingredient in Golden Shell is good news for cars of all ages

WHEN SOMETHING gums up the oiling system in your engine, look out!

That's exactly what happens when oxidation occurs in motor oil. Oxidation is the parent of sludge . . . that sticky, gummy substance which gets into oil lines and oil filters, and cuts down the flow of good lubricants to a point where the engine suffers from oil starvation.

To minimize oxidation in motor oil was the objective of intensive wartime research. Success rewarded the scientists, and now you can buy Golden Shell Motor Oil containing a war-born oxidation inhibitor that's added during manufacture. Because of this inhibitor, new Golden Shell stays full-bodied and free-flowing from one oil drain to the next . . . offers better protection to cars of all ages.

This new and better motor oil is waiting for you at the nearby Shell station. Shell Oil Company, Incorporated.

Like oxidized paper—oxidized oil is no good

You've seen paper that's yellowed with age . . . brittle . . . lifeless. That's the result of oxidation, the same destructive chemical reaction which rusts iron, fades cloth, cracks rubber. And oxidation is the parent of sludge in motor oil, too. That's why you need new Golden Shell motor oil. It contains an oxidation inhibitor, added during manufacture.

SHELL CREDIT CARDS ARE BACK. Honored at all Shell stations in United States and Canada. Apply for yours at any Shell office or service station.
