Even small closets in fact, especially small ones, need light.

It's a matter of little expense and a source of great pleasure when an overhead or wall light is added. Be sure to make the switch easily reached. Each possible spot for read-

ing should be well lighted. Some sort of lamp should be located near each chair. Some persons like pin-up lamps, many like permanent wall lights, others prefer indirect lighting from floor lamps.

Working spots such as near the sewing machine, kitchen sink, stove, dressing room, writing desk, need ample light. The reader-in-bed needs good light too, often adjustable to only one person, allowing the remainder of the room to be dark.

There should be more illuminated house numbers, at least that's what one thinks when trying to find an address on a dark night. One type house number has cut out numerals with a small bulb behind them. There are other methods of lighting numbers which include the porch light, or combined with mail box. Plan the best

WE'RE SORRY! Yet We're Glad.

Because of the tied up transportation over the holidays our key personnel has been delayed in transit. Some in Salt Lake, some in Los Angeles. This fact prohibited our opening last night for which we are genuinely sorry. However, we are glad, through this circumstance, that some very deserving soldiers and sailors have been able to get home for Christmas which, we know you will agree, is more important than our opening. Watch for announcement. We will be open in a few days.
