

Jobless Pay Checks Down

Payments to Marion county's unemployed civilians during June are down 36 per cent from May and readjustment payments to veterans are down 6 per cent, the state unemployment compensation commission reported Saturday.

Reasons given by the commission for the slump in payments are an increase in job openings, expiration of many claims and increased seasonal summer work.

Surplus Consumer Production Appearing in Some Industries

By the World Staff of The Associated Press
WASHINGTON—Although output of numerous consumers' goods remains far short of demand, some heavy industries are producing more than they can sell and may have to scale down their production schedules unless foreign markets are found.

Some government trade officials say many workers in these industries may soon find their jobs gone. Surpluses are appearing in railroad equipment and some types of machine tools, and they are in sight later in communications and power equipment.

Around the World

Paris—Diplomats from smaller nations are talking about appointing observers to keep in touch with the "big four" foreign ministers during their conferences here. They want to keep their countries from being used as a mere collective rubber stamp at the proposed 21-nation peace conference.

London—The foreign office has announced a mission will visit Argentina soon to discuss the possibility of selling British-owned railroads there. Argentina wants to nationalize the roads.

Manpower Gamble

Washington—With the new draft law exempting 18-year-olds, the army feels that obtaining sufficient manpower will be a gamble.

Andy Russell and Don DeFore don't approve of the attention Betty Hutton is showing Barry Fitzgerald in this scene from Paramount's "The Stork Club," now playing at Warner's Capitol Theatre.

Joan Leslie, Bob Hutton in Elsinore Film

"Janie Gets Married," Warner Bros.' sprightly successor to the original "Jane" who made her initial and refreshing screen appearance a couple of seasons back, makes its local debut at the Elsinore theatre today with a topnotch cast headed by Joan Leslie in the title role and Robert Hutton as her bewildered bridegroom.

Gary Cooper In 'Marco Polo' Now at Grand

A magnificent cavalcade of romance, splendor, excitement and fun moves swiftly across the screen of the Grand theatre in Samuel Goldwyn's greatest screen masterpiece, "The Adventures of Marco Polo."

This current Grand attraction offers Gary Cooper in his most romantic role as the swashbuckling adventurer who was the world's first travelling salesman and opened the first important trade route between Europe and Asia during the colorful reign of the great Chinese Emperor, Kublai Khan, fighting and loving as he went.

The picture also introduced Sigrid Gurie, the Norwegian beauty discovered by Goldwyn, who completely captivated last night's audience with her rare loveliness, charm and ability.

Plans Ready For Trip Over A-Bomb Target

(Story also on page 1)
KAWAJALEIN, June 30 (Sunday)—(AP)—Engineers began to load the atomic bomb aboard the B-29 "Dave's Dream" for its run over the Bikini target tomorrow shortly after Adm. W. H. P. Blandy made his decision to start the test as scheduled.

As soon as possible after daybreak, the pilot of the superfortress—Major Woodrow P. Swancutt of Wisconsin Rapids, Wis.—will take off and the fleet of aircraft assigned to the show will begin maneuvering into position. The other planes will carry cameras, recording instruments, newsmen, observers and members of President Truman's evaluation commission and the joint chiefs of staff evaluation board.

The human beings nearest the explosion probably will be those aboard the Mt. McKinley, some eight miles from the point of blast.

Sky Armada on Hand

There will be a veritable sky armada weaving an intricate pattern in the skies above the target fleet, with pilotless "drones" being herded through the air by "mother" planes to record the turbulence and radioactivity of the explosion.

Farrell said Oregon's percentage of defective cars closely approximates the national figures indicating 37 per cent of the cars tested were defective. The national survey showed that insufficient lights and brakes are commonest defects.

Farrell Urges Drivers Take Greater Care

Pointing to figures on automobile registration, gasoline consumption and traffic defects, Secretary of State Robert S. Farrell, Jr. Saturday called upon Oregon drivers to exercise greater care in driving than ever before, in order to reduce traffic accidents.

Current registration of 434,120 motor vehicles in Oregon is only eight percent higher than registration a year ago, but gasoline consumption now is up 50 per cent from last year, Farrell stated to show the greatly increased use of motor vehicles at present.

Moreover, Farrell announced, more than one-third the Oregon automobiles checked by police recently in connection with the nationwide traffic safety checkup were defective in some respect.

Gary Cooper having a little girl trouble in Samuel Goldwyn's great romantic spectacle, "The Adventures of Marco Polo," now playing at the Grand Theatre with Basil Rathbone, Lana Turner, Sigrid Gurie and Alan Hale in supporting roles.

"The Green Years is a wonderful motion picture!"

cloud mass rising from the explosion. Swancutt will climb to about 30,000 feet while other planes are moving into position. Then he will make the bomb run, with Maj. Harold W. Wood of Bordentown, N.J., the bombardier, taking over the job of dropping the missile about six miles through space toward the Nevada.

Destroyers Downwind

The destroyer O'Brien will be downwind 35 miles from the target and the destroyer R. K. Huntington will be 50 miles southeast of the target, acting as reference or guide ships to "Dave's Dream" on the bombing run.

But once the bomb explodes, the two destroyers will begin a race with death to escape the radioactive cloud which will be driven by the wind in their direction. Once safely out of the path of the

ARRANGE TO GET NEW PLATES WITH ACCEPTED CREDIT

Accepted Credit offers you opportunity to obtain plates now and pay while you wear them.

Dr. Painless Parker Says:

"When you see the new style plates made with improved transparent material, you will be struck, as have been dentists everywhere, by their realism and faithful reproduction. Plates are lighter, have better balance and a blended natural color that makes them hard to detect. They will not warp."

New Plates Have Beauty, Grace of Design, and Soft Lustre

Care has been exercised in perfecting the color in transparent plates to harmonize with individual features. And this fact is further strengthened by the crystal-clear palate that reflects the actual tissues of the mouth. Dentists agree that the resiliency of the material from which these plates are made provides stability and more wearing efficiency. Transparent plates meet the test of both looks and durability.

Translucent Teeth Bring Greater Resemblance to Plates

The effect of naturalness is increased when you have your dentures set with translucent teeth. These artificial teeth—the product of scientific laboratory research—absorb and reflect light as do fine natural ones. You can get them in the shade, size and shape of your present human teeth.

Pay as You Are Paid—By Week or Month

Budget dental services of all kinds. Start work right away and pay later. Dental plates, bridgework, extractions, fillings, crowns and inlays.

You Can't Afford to Risk Illness Through Neglect of Teeth

Unless teeth are kept in repair they disintegrate. Normal resistance is impaired. When poison finds its way into the system, it robs you of vitality and strength, leads to disease. Studies made in the nation show that more than 200 million teeth should be extracted, that there is need for 600 million fillings, and 20 million dentures. Pay as you prefer in weekly or monthly sums.

Plates Are Needed to Replace Unsightly Or Missing Teeth

When natural teeth are lost and nothing is done about restoring them, cheeks become hollow and facial muscles sag.

Make Own Terms, Within Reason, for Plates. Whatever Dental Service You Require.
