Report to people who are waiting for telephone service

We are rushing the equipment you'll use

From V-J Day through June 30, the number of telephones in service has been increased by 277,000, of which 206,000 were added in the first six months of this year—an unequalled increase for any corresponding period in the history of our company.

Thousands of additional telephones are being installed each month but there is still a tremendous job to be done. The Pacific Coast is continuing to grow at a rapid rate and new applications for service have been pouring in at double the rate of the corresponding period a year ago.

But we are rushing the equipment needed to fill all orders just as soon as humanly possible. We are hurrying construction on more than 140 new buildings and building additions, installing new equipment in almost every exchange, stringing thousands of miles of wire.

Your telephone is on the way; we will get it to you as quickly as we can. Thank you for your patience.
