Report to people who are waiting for telephone service

We've added telephones almost twice as fast as ever before... but orders keep pouring in

More than 324,000 telephones have been added on the Pacific Coast in the first full year since the war. During the first half of 1946 we added telephones almost twice as fast as ever before.

Still, there is a tremendous job yet to be done. The Pacific Coast is continuing to grow rapidly. New applicants for telephone service have been pouring in at double the rate a year ago.

But we are doing our best to catch up. Millions of dollars worth of new equipment is on the way.

You may be certain that we will bring you your telephone just as soon as we possibly can. Thank you for your patience.
