Morse Calls Truman U. S. Top Bungler

EUGENE, Sept. 21 (AP)—Sen. Wayne L. Morse, commenting on the Wallace-Byrnes-Truman controversy, called the president "the chief bungler in America" today, and voiced a suspicion that the president hadn't understood the speech that set off the dynamite.
Morse, recovering in a hospital from a minor illness, said he thought it wise for Wallace to resign. "However," he added, "the American people should not overlook the fact that the person more responsible than anyone else for the bungling that has taken place in this situation is Harry Truman."
"The newspapermen of the country know that originally Truman read Wallace's speech and approved it, and then tried to weasel out of it by saying he only approved Wallace's right to speak. What I suspect is, he didn't understand the speech after he read it."
"The important thing right now is to back Jimmy Byrnes to the limit, because he, more than any other man in America, is carrying the destiny of the American people on his shoulders."

New Horseshoe Falls at Niagara

NIAGARA FALLS, Sept. 20—A huge rock fall 120 feet wide at the top and 30 feet wide at the bottom, which shook the nearby city of Niagara Falls today, made this change in the previously almost straight face of the American falls, giving it some resemblance to the nearby Canadian Horseshoe falls. (AP Wirephoto.)

Western Union Strike Looms

WASHINGTON, Sept. 21 (AP)—J. A. Payne of the AFL national coordinating board said early today that the bargaining committee representing 50,000 employees had "broken off negotiations" with the eastern Union Telegraph company and would file a notice of intention to strike "within a few days."
Payne told a reporter the committee broke off negotiations late yesterday after representatives of the company refused to accept the union's request for a 16 1/2 cents an hour increase for all employees except messengers, who asked a 10 cents an hour increase.

Park Property Switch Sought

Harry B. Buckley, custodian of the part of Silver Creek Falls recreational area under control of the national park service, appeared before Marion County Judge Grant Murphy Friday seeking support in the move to promote passage in the next congressional session of pending legislation to turn over O & C reversioned land grant tracts to the national park service.
The long-discussed legislation would enable the service to, in turn, place the entire recreational area under state jurisdiction—a transfer now considered inadvisable because loggable O & C lands are in the general area mostly under park service control.
Judge Murphy indicated that Marion county probably will support the move by appropriate county court action. Buckley said he plans to solicit the support of all Oregon counties.

OPA Ruling to Provide Meat for Institutions

WASHINGTON, Sept. 20 (AP)—The OPA moved tonight to give hospitals, asylums, orphanages and prisons more meat.
It placed them in a preferred status, directing that each meat supplier sell them the same percentage of the institution's needs as he did in comparable months in 1944, when meat was rationed. The order is effective October 1.

BICYCLIST HURT IN WRECK

E. F. Gleason, 949 N. Winter st., was knocked off his bicycle and incurred a collarbone injury Thursday evening when he reportedly drove into the right front fender of an automobile at Center and Liberty streets intersection. Police who investigated said the auto driver was L. M. Stewart of Coquille.

Rock Fall Coincides with Earth Shock to Change Niagara Falls

NIAGARA FALLS, N. Y., Sept. 20 (AP)—An earth shock which coincided with a rock fall at the brink of the American falls alarmed residents of this honeymoon capital today.
The shock was recorded on the Canisius college seismograph, in 21-mile distant Buffalo. Dr. Austin McTigue, Canisius seismologist, said it was recorded as a "sharp but very weak" earth movement about 19 miles from Buffalo.
McTigue expressed doubt that it was an earthquake, describing the effect as indicated on his instrument as similar to that of "a blast or explosion."
But Capt. H. A. Collins, head of the Niagara state park patrol, said about 25 to 30 tons of rock fell from the face of the falls about 125 feet from Prospect Point.
Residents of this honeymoon capital and of Niagara Falls, Ont., were alarmed by the shock as employees of several factories rushed into the streets fearing an explosion had taken place and housewives telephoned fire departments.

Grain Futures Score Gains

CHICAGO, Sept. 20 (AP)—Grain futures scored substantial gains on an increased volume of trade today. Strong cash markets, reports of crop deterioration in some European countries and a forecast of cooler weather for parts of the corn belt stimulated buying.
The market opened slightly higher, lost some of its gains in early afternoon and then came back again to reach new high levels in the closing minutes.
Wheat closed 1 1/4-2 cents higher, January \$1.99, corn was up 1 1/4-2 1/2, January \$1.37 1/2-1/2, oats gained 1/2-2 1/4, September \$0 1/2-3/4, and barley jumped 1 1/2-2 1/4. November \$1.46.
At the close January wheat was only 2 cents below the seasonal high. At Minneapolis September wheat hit \$2.00, closing at that level. Continued commodity credit corporation buying of cash wheat strengthened near-by futures.

U. N. Puts Aside Greek Case

LAKE SUCCESS, N. Y., Sept. 20 (AP)—The United Nations security council today rejected a Russian-sponsored condemnation of Greece and then dropped the controversial Greek question from its agenda after Russia vetoed an American proposal for an on-the-spot investigation of reported shooting incidents along Greece's northern frontier.
Ukrainian charges that Greece threatened the peace of the Balkans were dropped, at least for the present, when the delegates defeated, by votes of 9 to 2, Soviet Russian and Polish proposals calling on the council to keep the case before it in an inactive status.

Red Cross to Seek Change in Organization

WASHINGTON, Sept. 20 (AP)—In a move for more democratic procedures, the Red Cross central committee had approved major revisions in the organization's structure.
Announcing the action, Chairman Basil O'Connor told a news conference the changes are the "most important and far-reaching in 40 years."
The chief one would have local chapters, through delegates to a national convention, elect 30 members of a board of governors of 50. The president of the United States would appoint eight members (one of them to be president of the Red Cross) and these 38 would elect the other 12.
The organizational changes were recommended by a study committee headed by E. Roland Harriman of New York. Before most of them can be put into effect, congress must revise the Red Cross charter. O'Connor said the revisions will be asked when congress meets in January.

Fiji Village Burned By Volcanic Flow

of here, advices reaching here said today.

There was no loss of life in the eruptions, which began Sept. 17, but all government buildings, the wireless station, stores, sheds, missions and boats were destroyed. Volcanic activity was subsiding.

U.S. Sends Tito Angry Note

WASHINGTON, Sept. 20 (AP)—The United States accused Yugoslavia today of failing to cooperate in maintenance of order in disputed Trieste, and denounced in particular the "obstructive and terroristic activities of pro-Slav elements."
This country's position was laid down in a formal note handed Marshal Tito's foreign ministry. The note said charges of "improper treatment" of Yugoslav soldiers in the zone of Venezia Giulia under Anglo-American control were "false and exaggerated."
It cited two cases of violence in that zone against Yugoslavs "known to be political opponents of the present Yugoslav government," and added:
"The ministry cannot suppose that activities of this nature can be undertaken by pro-Slav elements without promoting furious reaction from the local population."
