### Ground Meat Stretches Out Ration; Produces Good Baked Main Dishes

By Maxine Buren  
Statesman Woman's Editor

Inapimate though it may be, ground round (or hamburger) deserves a medal for distinguished trying times, ground beef steps in to produce very creditable dishes. Dishes of recipe are possible, but here are several, some old, some new, to be remembered.

#### FORCUPINES

- 1 pound hamburger
- 1 cup rice
- 1 unbeaten egg
- 1 onion, chopped

Mix and form into cakes, using some breadcrumbs to hold together if necessary. Brown in fat, and mix with about a quart of tomato juice which has been brought to a boil in a deep pan. Cover tightly and cook for an hour or more until rice is thoroughly done.

Another method of making these balls is to drop the meat mixture by spoonful into the tomatoes which have been diluted with water. Then make gravy with the liquid.

Yet another method is to brown the balls as in the first recipe, and lay them on sauerkraut, baking covered in the oven for an hour

## HYDRAULIC POWR-TROL ...

Newest Development in Farm Equipment Announced by Fred Stettler, Interstate Tractor and Equipment Co.

Farmers of this community will be interested in local John Deere Farm Equipment Dealer Fred Stettler's announcement of one of the most important new farm equipment developments in recent years—the new John Deere Hydraulic Powr-Trol.

Powr-Trol is a time-and-labor-saving device to lift, lower, and regulate drawn implements by means of a single remote cylinder which attaches to the implement and is connected to the tractor by two hoses. Safe, smooth, positive, hydraulic power does the job, assuring a positive lift and forcing and holding the implements to its work in any position selected by the operator.

At a touch Powr-Trol RAISES AND LOWERS plow bottoms or discs... grain drill openers... mower cutter bars... combine platforms... corn picker gatherers... potato digger shovels, etc. ANGLES AND STRAIGHTENS—disc harrow gangs—INSTANTLY changes working angle, depth, or height of drawn implements to meet varying conditions without stopping the tractor or even slowing down.

Integral equipment is operated in much the same manner as with the hydraulic power lift, pioneered by John Deere, except for an important new feature—accurate, variable depth control.

Mr. Stettler claims that the new John Deere Hydraulic Powr-Trol means easier, faster, better work on every job. It is designed for John Deere Models "A", "B", and "GM" Tractors and companion John Deere farm equipment. However, change-over parts for converting certain older John Deere equipment to remote-cylinder operation are in the process of design or manufacture.

Powr-Trols will be available in very limited quantities during the next few months, though everything possible is being done at the factory to increase production.

## Agnes Booth Tells Kiwanis Of School Bill

An affirmative vote for the school support bill would be of "major help" in paying the way for solution of an extremely serious teacher shortage in Oregon schools, County Superintendent Agnes Booth told the Salem Kiwanis club Tuesday.

Mrs. Booth said there were 109,000 emergency teachers, "under-trained and unskilled," at the end of the last school year, nearly 2500 of them in Oregon alone, and that every eighth child was under this type of instruction because experienced teachers were not obtainable. She also said that the 1100 persons who were graduated as teachers in this state in 1931 had dwindled to 102 last year, and that a minimum of 500 was needed annually "even in normal times."

Frank Bennett, superintendent of Salem schools, augmented Mrs. Booth's talk by answering questions from the audience.

Both speakers stressed "the urgent need for equalization of the opportunities of a good education," in asking approval of the initiative petition for school support at the November election, and declared that even the amount sought (\$15,000,000, or \$5,000,000 over present totals) might not fully meet what was termed a "real crisis."

Wisconsin is known as the Badger State.

A 3% TAX ON  
YOUR INCOME!  
Can You Lift Yourself By Your Bootstraps?  
NEITHER CAN OREGON!

## THERE IS NO SUCH THING AS SOMETHING FOR NOTHING

The bill "To Create State Old Age and Disability Pension Fund" is the Townsend scheme! It promises to make everybody prosperous. It takes money from one group of citizens and gives it to another group. That's "bootstrap-lifting". It never has worked. It can't work.

## LET'S UNDERSTAND 3 SIMPLE FACTS

- Townsend "pensions" are not insurance; no reserves are set up to guarantee payments.
- If a 3% tax on your CASH RECEIPTS does not squeeze out sufficient tax cash to pay \$100 a month, there will be agitation to increase the rate to 4, 5, 6 and 7%. This Townsend scheme takes savings from GI Joos and Janes, to give to all over 60 whether needy or not.
- This is a tax on GROSS CASH RECEIPTS, with no deductions for losses, cost of merchandise sold or operating expense. "Net gain" or "profit" is not the basis of the tax. (Only \$100 of cash receipts a month is tax free!)

## Cost of Living in Oregon

- Apples: Accumulated 3% taxes, grower to consumer, 54¢ a box. Could Oregon apples be sold in competition with Washington's? NO.
- Lumber: Accumulated 3% taxes, logger to consumer, \$5.18 a thousand board feet. Could Oregon lumber be sold in other states? NO.
- Bread: Accumulated 3% taxes, wheatfield to consumer, 2¢ on a 1 1/2-lb. loaf of bread, from 16¢ to 18¢.
- Canned Peas: Accumulated 3% taxes, grower to consumer, 19.71¢ a dozen cans. Would such handicap to Oregon industry close up factories, reduce employment? YES.

## Don't VOTE Yourself Out of a Job!

## Cost of Dying in Oregon

- Your widow will pay 3% on cash received from your life insurance policies, either annuity or lump sum payments.
- Burial facilities will cost more.
- Your children's inheritances will be taxed 3% before inheritance tax.
- Special bequests to friends, relatives, will be reduced 3%.
