

Gardening Today

Don't forget the Salem Fall Flower and Garden show at the YMCA Saturday, Oct. 26, afternoon 2 to 5 p. m. It is sponsored by the Salem Men's Garden club. Everyone is urged to enter in the show and to visit the displays. The auction will be at 8 p. m.

The garden clubs about the valley are doing a very good job of interesting their communities in better living, and it is really surprising to find how many little garden clubs -- and some not so small -- there are.

Down at Jordan (with a Soc address) the club, which has organized only a year ago, now has 25 members. Pauline Bachmeyer

is the president; Nina Westenhouser, vice president; Sylvester Limbeck, secretary-treasurer. Mrs. Bachmeyer dropped me a note giving me some of the interesting topics -- November, hardy lilies, mulching and fertilizing; December, Christmas decorations; January -- rock gardens, February -- winter bouquets from forced shrubs; March -- round table discussion; April -- tips on lawn care; May -- care of roses; June -- new varieties of roses; July -- transplanting and thinning in flower and vegetable garden. The programs sound interesting, but I do not have the date of month on which the group meets. Perhaps one of the members will mail this to me?

Set the stage for spring is a good garden slogan for autumn. This might include burning rubbish that harbors insect pests and diseases -- iris leaves, tops of peony plants, are good examples of something to burn... Spade all cultivated areas such as vegetable garden, annual flower beds. Allow the ground to remain rough during winter... Dig, clean and store all tender bulbs and roots in a cool, dry place. This includes gladiolus, dahlias, tuberous begonias. Avoid bruising these, which might permit fungi to enter, causing rot... Clean off the rose beds, picking up dead leaves, cutting off seed pods, and feed a little bonemeal... Be sure the camellias and rhododendrons, as well as any other little newly planted evergreens do not go into the winter in a dry state. If you do not think the rain has reached the roots, soak the ground... Store garden furniture and equipment. Drain hose, cover tools that will not be used during the winter with a film of oil to prevent rusting... Give the lilacs a generous feeding of bonemeal. Do not put spray apparatus too far away. Spraying comes in December and January for some shrubs and trees... Bait again for slugs. They are very active dur-

Questions and Answers
P. C. Salem, asks when should magnolia glandiflora be pruned?
Ans. It is a rule never to prune the magnolias more than absolute-ly necessary. Perhaps take out a branch that rubs, or, of course, re-moved dead wood. Keep tree shapely (but if not pruned heav-ily, the tree usually manages to keep itself shapely -- more than some of the rest of us can). If you must cut back the magnolia, do so now but do not cut back too much -- not more than half of this season's growth.

D. G. F. Salem, asks for the name of a good book on rhododen-drons.

Ans.: There are a number of expensive and beautiful volumes on azalea and rhododendron cul-ture -- many of them have been out of print during the war years and are difficult to pick up. I have found the little new book, "The Handbook of Rhododen-drons," compiled by the Arbore-tum Foundation of Seattle, a very useful book. It isn't too awfully well bound and it sells for \$5, but it is worth the price. It has an exhaustive list on varieties and gives some very useful information on culture.

W. P. asks for the names of "a couple of good red rhododendrons, and the pink one which is so popu-lar now."

Ans.: Mars is considered one of the very best red ones. There are also B. de Bruin and Bagshot Ruby, Earl of Athlone and Brit-annia. As to the popular pink one: I suppose Pink Pearl is meant but Mother of Pearl, a sport from the Pink Pearl, is believed to be much better. However, I still have no complaints to make on the action of my own Pink Pearl.

W. H. R. asks when to move delphinium plants. Would like to move before spring.

Ans.: If the new bedding place is ready, move at once. Otherwise wait until spring.

F. E. L. asks if petunia cuttings can be made.

Ans.: Yes, cuttings can be taken now, rooted in sand and planted out in spring. Most petunias are propagated from seed as they grow so easily. However, if there is a particular color you want to be sure to have, take a few cuttings now. You have to protect the cuttings from frost.

Trade Nervous In Grain Mart

CHICAGO, Oct. 19--(AP)--Closing of cotton markets produced considerable nervousness in grain trading today and prices declined sharply, led by another break in wheat. The bread cereal was off 4 1/2 to 5 cents at the close, all deliveries selling well below the \$2.00 mark.

There was some "scare" selling of grains. In addition, traders said there appeared to be hedging sales by those who had bought cotton and wanted protection in case commodity markets again develop weakness next week.

The January wheat delivery closed at \$1.96 1/2. Corn finished 1 1/2 to 2 cents lower, January \$1.35 1/2, and oats were down 1 1/4 to 3 cents, November 77 1/4-78.

The commodity credit corporation reported purchases of 174,443 bushels of wheat between Oct. 10 and Oct. 16, confirming the trade impression that the agency was not active in the market.

The PMA reported that the

Stock Market Shifts Lower

NEW YORK, Oct. 19--(AP)--The stock market shifted irregularly lower today although holding a net gain on the week for the first time since the period concluded Sept. 27.

The final session was the slowest of the past two years. While modest advances were well distributed at the close, minus signs maintained the majority. Transfers of 300,000 shares compared with the previous Saturday two weeks ago of 370,000 and was a minimum since Oct. 28, 1944.

Apprehension over the recent slump in commodities, brokers said, together with caution inspired by decontrols, the climb of industrial inventories to a new peak, the complex international picture as described by Secretary Byrnes, and thoughts of a possible business deflation in coming months, served as a speculative and investment restraint.

Make Plans Now

You read a lot about the miracle kitchens of tomorrow, about wonderful new inventions that will take all the work out of preparing the family meals. Your kitchen of tomorrow can be no better than the plans you make for it today. Why not come in and talk it over with us. We have started planning your Post War Kitchen for you, and can help you make them a reality instead of a dream.

Baby Wardrobe

We've designed a special wardrobe for baby's clothes.

'Life With Father' Will Be at High School on Nov. 5

Tickets will be available Monday at Maple-Keene Sporting Goods for "Life With Father," the featuring Edwin Maxwell and all-time record-breaking comedy Viola Frayne, which will be seen at the Salem high school auditorium one night, Tuesday, Nov. 5, under sponsorship of the Salem Rotary Club.

"Life With Father" was an instantaneous hit when it opened on Broadway eight years ago, and in the succeeding years it has lost none of its allure.

Maxwell has had considerable experience on the Broadway stage, both as leading man and director, and in Hollywood he has appeared in over 150 pictures, including "Mr. Deeds Goes to Town," "Fury," "Union Pacific," "Reap the Wild Wind," "The Story of Dr. Wassell," and "Swamp Fire."

Miss Frayne has an equally impressive record on Broadway and in Hollywood.

Proceeds from the production will be used to supplement the Rotary club scholarship fund.

Portland Grain

PORTLAND, Ore., Oct. 19--(AP)--Wheat futures unquoted.

Cash grain: Oats No. 2--38 lb. white \$3.90; barley No. 2--45 lb. B.W. \$3.00; Corn No. 2--E.Y. shipments \$2.50; Cash wheat (bid): Soft white 1.85; soft white (excluding Rex) 1.85; white club 1.85; western red 1.85.

Hard red winter: Ordinary 1.85; 10 per cent 1.98; Hard white hard: 10 per cent 2.27; 11 per cent 2.29; 12 per cent 2.31.

Today's car receipts: Wheat 36, barley 7, flour 3, oats 2, millfeed 6.

CHRISTMAS TREES CUT
BEND, Oct. 19--(AP)--The Christmas tree country is busy again. Ten thousand trees have already been sold from the Deschutes national forest, and are being shipped to southern California warehouses for the Yuletide season.

OVER 250 MILLION DENTAL CAVITIES REQUIRE FILLINGS

If your teeth need repairs of any kind you can arrange for payments with Accepted Credit.

Dr. Painless Parker Says:

"Do you know that among adults in the United States 70 million new cavities occur in their teeth every year, or that there is now an accumulation of over 250 million cavities among grown-ups? Why risk your health, when you can have dental wants taken care of with credit?"

Make Your Own Terms Within Reason

Pay by week or month with Accepted Credit. Accepted Credit enables you to pay for dental plates, bridgework, fillings, inlays, crowns and extractions in weekly or monthly sums. You can make your first visit without an appointment for whatever repairs or dental service you need.

Dental Health Needs Continue to Be Widespread

It is estimated that 25 million teeth should be extracted and that 1 million prosthetic appliances, plates and bridges are needed each year. When you neglect teeth you endanger future well-being.

Dental Plates for Health as Well as Appearance

Select plates made with the improved transparent material all dentists recommend for faithful reproduction and balanced strength. Plates have carefully-blended color and beauty and grace in design. They will not shrink or warp.

Newstyle Dental Plates Offer Lifelike Effects.

Start Dental Work Right Away and PAY LATER

New Dental Plates Are Resilient and Longer-Wearing

Dentists everywhere acclaim the refined material used in plate-making for its adaptability to individual needs. Plates are lighter in weight but of enduring strength. They have a natural permanent form as well as natural permanent color. Unless lost teeth are replaced with plates, cheeks become sunken, muscles get flabby and sag, your whole expression drops. But you can help to save your vertical profile with plates that protect natural features.

Translucent Teeth That Resemble Human Ones

The dental profession is indebted to science for these perfected artificial teeth that absorb and reflect light as do fine natural teeth. They simulate the realistic appearance of your own teeth since they are available in the shade, size and shape of your present ones.
