

### Wheat Futures Sustain Drop

CHICAGO, Jan. 18.—(AP)—Indications that large quantities of wheat were being offered to the Commodity Credit Corporation at Kansas City, plus uncertainty regarding next week's CCC buying policy, produced a lower market in wheat futures today for wheat. Oats were fractionally lower, following the leadership of the bread cereal, but corn displayed resistance to the decline. Some of the support in the yellow cereal was attributed to elevator and shipping interests.

When closed 1/4-1/2 lower, January \$2.13 1/2, corn was 1/2 lower to 1/4 higher, January \$1.32 3/4-1/2, and oats 1/4-1/2 lower, March 74 3/4-1/2.

### Margin Return Aid to Stocks

NEW YORK, Jan. 18.—(AP)—Heavy early buying of stocks today followed the restoration of margin trading and, despite subsequent profit cashing, market leaders finished a spotty week generally on the upside. Activity was pronounced at today's opening with gains running to 2 or more points.

Brokers' quarters were cheered by the Federal Reserve board action, which came late yesterday, but the thought was stressed that the return to 75 per cent margins, effective February 1, still would leave the market in a relatively "thin" shape. Transactions have been on a cash basis since last January 21. It was also suggested that the Reserve ruling indicated that the inflation peak may have passed and that, henceforth, securities might have to contend with a certain amount of "deflation psychology." Numerous customers, consequently, were quick to cash in on the early swing.

The Associated Press 60-stock composite was up 1/2 of a point at 65.4 and for the week showed a net gain of 4 of 884 issues registering, broadest for any Saturday since last April 11; 686 rose and only 82 declined.
