

'Cease Fire' Adds to Blood, Dutch Assert

LAKE SUCCESS, Aug. 22—(AP)—The Netherlands told the security council today that the United Nations cease-fire order had only increased bloodshed in Indonesia.

The Dutch then told the council that it must either "send troops" or let The Netherlands alone take measures to restore order.

The announcement that both sides would comply with the council's cease-fire call as of midnight Aug. 4 had been hailed as the council's greatest triumph to date in its peace-keeping efforts.

Dr. Eelco N. Van Kleffens, Netherlands representative, branded the council's efforts a dismal failure and charged: "Never was there such killing on the part of the republican troops and bands since your cease-fire order."

Off the floor, Sutan Sjahrir, former Indonesian premier, said that recent reports from Java and The Netherlands "indicate that the security council's cease fire order is hampering projected Dutch military action."

CONFERENCE RECESSES

WASHINGTON, Aug. 22—(AP)—High-level Anglo-American conferences on Britain's economic crisis recessed suddenly late today, apparently without a decision on Britain's plea for a free hand to trade where she wills but with an agreement to keep "technical" discussions going.

Proposed World Commerce Group Charter Readied

GENEVA, Switzerland, Aug. 22—(AP)—The delegates of 17 nations representing 63 per cent of world commerce adopted unanimously today a draft charter for a proposed international trade organization for the broad purpose of reducing trade barriers.

The 4,000-word document, hammered out in seven months of negotiations in London, New York and Geneva, is intended as a bill of rights for international trade. The draft is to be submitted to a world trade conference of 60 nations at Havana, Cuba, in November.

Objectives of the charter completed today are listed broadly as the increase of world production, employment and trade, the fostering of industrial and economic development and reconstruction, equal access of all countries to markets, and the reduction of tariff preferences and trade encumbrances.

Under the charter all members agree to extend to one another equal treatment in trade, long espoused by the United States as the most-favored-nation policy.
