The housing was supposed to be vacated some weeks ago, but some families stay on saying they can find no place to move to. Unfortunately heads of some of these families seem indifferent as to whether their children go to school or not.

These children should be rounded up and made to come to school and stay in school. Other wise they will grow up as ignorant youth, ill-equipped to enter the competition of earning a living. To let them run wild merely cultivates habits of Oregon State Federation of Labor, 21 to 44 years of age. Initial apshiftlessness and gives them an additional handicap in life. If the children do not report promptly then the compulsions of law should be invoked on them and their parents.

WASHINGTON, D. C .: - From the well of the house chamber, President Roosevelt addresses the members of both houses of congress, with his report on the Yalta conference. They undoubtedly gave the president their estimate of what such an invasion would cost us in human lives with Russia in the war and what the cost would be if Russia were out of the war. They naturally wanted Russia in the war to engage the Japanese armies in the north. But once Stalin knew our plans for invasion were under way, he knew also that we would want his armies and he could demand more for them. Mr. Stalin is not bashful about making demands.

Secrecy Essential

Nor should President Roosevelt be criticized for keeping the agreement secret. The Soviet Union was party to a treaty with Japan and we could not announce Russia's intention to go to war with strength was then concentrated on the German campaign. Any hint of agreement would have been an invitation to the Japanese troops on Russia's borders to launch an invasion. It was in the interest of all of us to allow the Soviets 90 days after Germany's surrender to transfer troops from the European

Toward the end of the conference, Marshal Stalin entertained at dinner. At the time, the press ent as saying 45 toasts were prois misleading. Unexplained, it would indicate the diners were thoroughly intoxicated. The fact is that with each toast, the diners took only a sip of wine and many made the gesture without the sip. The dinner lasted four hours. Forty-five sips of wine in four hours, during which time enough food was consumed to last twentyone of that group. As for me, I do not drink wine.

Toasts are Water

About the time we reached the soup course, I noticed Mr. Vyshinski, who was sitting near me, pouring water into his vodka glass. Since vodka is the color of water, I decided if he could do it, I could. In the confusion incident to everyone's standing up when a toast was proposed, I would pour water into my vodka glass. It was not very stimulating, but I do know what took place at the dinner. Because of some of the reports in the United States about Soviet officials getting intoxicated, it is only fair to say that all those with whom I have come in contact have been most temperate...

The marshal was generous in the toast he proposed to Churchill and particularly generous in his remarks proposing the health of the president, whom he described as the "chief forger of the instruments which had led to the mobilization of the world against Hit-
