HOUSING PLAN SERVICE, Inc.

THE YORKTOWN—Lord Cornwallis did not sleep in this delightful, two-story home. The Yorktown, but its inspiration flows from both the headquarters that Cornwallis and George Washington used during the famous battle that did so much to insure our independence. The wise family that builds this substantial home in brick or tile, or combinations of both, will insure its own independence from upkeep and repair worries for many years. These sturdy materials also make the house virtually fireproof, especially if topped with a slate roof. They come in a wide variety of colors and textures of which warm reds are the most authentic for this style of home, and probably most popular and attractive as well especially when set off with gleaming white shutters and trim. The plan of The Yorktown was adapted by Structural Clay Products Institute from the nationally famous plan for the ideal, small, two-story house developed by The National Small Homes Demonstration. Almost the entire first floor area is given over to living room, which includes a pleasant alcove for dining. The result is a grand "family room" 24 feet long. The stairs rise out of the back of this room and lead to two splendid bedrooms with abundant closets and a conveniently located bath. The plans provide for a full basement and also show how a garage may be attractively attached to the house. The plans were drawn to conform to the standards of FHA and also to those of The National Adequate Wiring Bureau with respect to the electrical layout. Architect's detailed blueprint cost \$7.50 per set and may be obtained from Housing Plan Service, The Oregon Statesman, 140 Nassau Street—New York 7, N. Y.

4 Corners Women Hear Of Filipinos

To a large gathering of women in the Four Corners community hall Tuesday Eleanor Trindle, Marion home extension agent, demonstrated uses and kinds of pressure saucepans. Twelve precautions and directions for safe use of eight different pressure pans were given and inadvisability of canning in the saucepans was stressed.

Members of the Four Corners unit were served the meal prepared in the saucepans by Miss Trindle and the hostesses, Mrs. Waldo Miller, Mrs. Hardie Phil-

lips, Mrs. Clifford Morris, Mrs. Dale Jeffries and Mrs. Ralph King. Assisting the hostesses were Mrs. Warren Shrake, Mrs. William Brown, Mrs. L. J. Stewart, Mrs. Jess McInay, Mrs. Jack Scorgie and Mrs. Willard Willer. The business meeting was conducted by Mrs. L. Shrake, president, with 30 members and seven visitors present. The unit voted money for the Azalea House building fund and subscription to "Country Women," published in England in conjunction with the A.C.W.W.

Several new members were added to the unit membership roll. Highlight of the afternoon was a talk by Miss Presentation Atienza, home demonstration agent in the Philippines. She stated one of the first projects they held was the improvement of the kitchen, which was hard to do since the

Japanese occupation of the islands. The wood used is mostly bamboo and very few homes have electricity, so native stoves of clay are used. Philippine women are very proficient at baking in these clay stoves.

They have had little or no sugar until recently. Rice is used in place of bread and they cook vegetables, chicken and fish but little meat, not only because meat is scarce but they are not too fond of it. Coconut milk is used in much of their cooking, even to cooking some fish and chicken stews, and milk to them means coconut milk as very little fresh or canned milk is available.

Work of the home demonstration agent in the Philippines is similar to work done here, helping the women improve working conditions and home environments. Miss Atienza feels home exten-

sion work is so important she is financing her own trip to the States in order that she may help her countrywomen. The Philippines observe Christmas much as in the States, going to church, exchanging gifts, decorating pine trees, hanging up stockings and even a Santa Claus.
