# **Stocks Make Good Showing**

NEW YORK, Jan. 14-(AP)-Oil and aircraft shares made the best showing in a narrowly irregular stock market today.

While most issues wobbled back extreme of more than 2 points. Trading interest in the majority of cases was lukewarm at best and olume dwindled to 820,000 shares, compared with 950,000

The president's second annual economic report was a market dud. Wall Street found little in the policies presented that had not been previously recommended by the president and, as was true with the state of the union and budget messages, found just as

little to its liking. Oil shares, brokerage quarters said, benefitted basically from the high world-wide demand for petroleum products and were given an additional fillip by recent discovery of new resources in Texas. Aircraft makers stand to profit by an expanded air force. The Associated Press average of 60 stocks dipped .1 of a point to 64.4. Of 952 issues traded, 340 advanced and 390 declined.

# Feed Grains, Soybeans Set Record Highs

CHICAGO, Jan. 14 - (AP) - Feed grains and soybeans set new alltime record highs on the board of trade today, but a late selling movement gave the market an irregular appearance at the close.

Wheat ended 114 to 2 cents lowlower to % higher, May \$2.6714-4. oats were % lower to 1/2 higher, May \$1.2712-58, and soybeans should be sought, since the Lions were 1 to 8 cents higher, March

based upon the statistical position permanent or whether the bus for these grains, plus the pospect that cold weather in the midwest would increase farm feeding. The bureau of agriculture economics noted that "carryovers of feed grains are expected to be much smaller than in 1947."

Wheat staged its run up after became known that the local office of the commodity credit corporation bought 108,500 bushof wheat yesterday. The amount was small and nothing was taken at Kansas City or Minneapolis

Crop reports, both domestic and foreign, continued mostly on the to attend the Mill City Lions club favorable side. In Kansas, according to the weekly weather bureau report, "winter wheat made favorable progress during the week ending January 13 with some wheat emerging in late seeded fields. Conditions were especially favorable in the south central and southwestern areas."
