Here's why we say WOMEN CAN GO PLACES IN THIS BUSINESS

1. This is a story of a typical Pacific Telephone "career girl." She started as an operator back in the thirties... a good job then, even better now. Today most new operators just out of high school average better than \$35 a week when they start handling calls and many experienced operators earn \$60 a week.

2. She was promoted to supervisor after a few years. Training new girls was an important part of her job... for Pacific Telephone was growing. She enjoyed vacations every year... with pay, of course. And she joined in many local telephone activities. Found telephone people friendly and sociable... on or off the job.

3. She's a chief operator now supervising 70 women... her responsibilities and experience help determine her salary of \$4,500 a year. Many "chiefs" earn more. Two-thirds of our people are women—hundreds have management jobs—five are assistant vice-presidents. Yes, women can go places in this business.

4. Telephone jobs must be good jobs to attract the capable people needed to furnish service. Good pay, steady work and an employee benefit plan give a strong sense of security. Comfortable surroundings, vacations and friendly fellow workers help make work pleasant.
